

REACH Declaration

To whom it may concern,

declaration according to the regulation EC 1907/2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH).

Thank you for your interest regarding the conformity of our products to regulation EC 1907/2006. As a manufacturer, we are declaring the following:

According to REACH, we are only concerned as a so-called "downstream user". Since we are neither manufacturing nor creating substances or chemicals, we are not obliged to register or pre-register any of our products.

According to Article 3 ("Definitions") of the regulation, the products we are delivering to you are considered non-chemical products ("goods"). Since our products do not emit any substances, Article 7 of the regulation does not apply.

As a downstream user, we will continue to comply to all requirements arising from REACH that apply to our products. If necessary, we will inform you about relevant changes of our products induced by REACH and the deliverability as well as the quality of our products or parts thereof, which are delivered to you on the basis of our business relationship. If deemed necessary, we will coordinate appropriate measures.
