WE'RE LOOKING FOR:

**Project Manager/ Engineer
(m/f/d) Heat and Energy
Technology for Contracting**

Would you like to take on a leadership role in a dedicated team and contribute your ideas? Are sustainability and a green future important to you? Then we look forward to receiving your meaningful application by e-mail.

G2M
GREEN 2 MARKET

WHO WE ARE:

The company Green 2 Market, headquartered in Meppen (DE), with the holding company in Denmark (Copenhagen) and offices in Spain (Madrid) and Portugal (Porto and Lisbon), is one of the leading project specialists in the field of renewable energy, with a focus on photovoltaics in Europe. We develop, build and operate projects for well-known investment partners and on our own books. With more than 30 years of experience in the market and an excellent order volume, which already secures our employment until well into 2022, we are well prepared for expansion.

This expansion is to be developed by the right team players with competence and to be established together with our subsidiaries increasingly also on the German market.

Innovative ideas, customer-specific solutions, also own project and product developments, as well as the high market and customer orientation have made us a strongly growing company in the industry. This gives us the confidence to successfully implement new topics such as GRÜNSTROM and GRÜNGAS marketing, or hydrogen technology and solar projects in Germany.

With our high-performance team, we look forward to new challenges and exciting tasks in this forward-looking market.

The picture shows one of the largest PV plants in Portugal with a capacity of 66,000 KWp, which is built and operated by us.

WHAT WE'RE LOOKING FOR:

Project Manager/ Engineer (m/f/d) Heat and Energy Technology for Contracting

Your area of responsibility:

- You will manage technical projects in the field of energy efficiency and energy performance contracting (ESC) or energy performance contracting (EPC) throughout Germany.
- You will ensure that our customers achieve the planned energy savings and functionalities by implementing the right technical measures in building services engineering
- You are responsible for the project order after the acquisition by your sales colleagues and close the corresponding order scope
- You are responsible for designing innovative and efficient energy systems to supply our customers with energy, heating and cooling in a resource-saving way,
- You calculate the investment costs for complex contracting plants.
- You derive task packages on the basis of the project goals and divide them up according to the available resources.
- You will take responsibility for permit applications for official procedures and commission the tendering and awarding of construction services and planning services relating to the construction of energy plants.
- You also assume responsibility for budget control and construction supervision from an economic and scheduling point of view and, within the scope of their client duties, for controlling and supervising service providers and contractors.
- You plan efficient energy generation plants.

YOUR PROFILE:

- Technical university degree, specializing in technical building equipment, energy and heat technology or comparable or training as a technician with several years of professional experience.
- Additionally completed technical training e.g. heating engineer, electrician or with similar focus is desirable but not necessary.
- Knowledge of relevant standards and regulations, especially VOB, HOAI.
- Distinct economic understanding
- Sound PC user skills.
- Cost-conscious and service-oriented action and a structured/self-reliant way of working as well as team player qualities.
- Pronounced IT affinity and understanding of digitalization topics
- Ability to identify market trends (based on industry and methodological experience).
- Strong analytical skills and the necessary flair for details.
