

## **SERVOPRO** 4900 Multigas

HIGH PERFORMANCE CONTINOUS EMISSIONS (CEMS) ANALYZER, DESIGNED FOR MULTI-GAS MEASUREMENT OF CRITERION POLLUTANTS, GREENHOUSE GASES AND REFERENCE OXYGEN.

## SERVOPRO 4900 Multigas 🙌 🦜

The 4900 Multigas offers high specification multi-gas monitoring designed specifically for the continuous emissions monitoring of flue gas. This sensitive analyzer combines leading edge patented sensing technologies including paramagnetic O<sub>2</sub>, non-dispersive infrared (NDIR) techniques of Single Beam Single Wavelength (SBSW), and Gas Filter Correlation (GFx). When used with a suitable sampling system the 4900 Multigas provides unparalleled MCERT/QUAL1 measurements of criterion pollutants NO, SO<sub>2</sub>, and CO, plus O<sub>2</sub>, and greenhouse gases CO<sub>2</sub>, N<sub>2</sub>O<sub>3</sub>, and CH<sub>4</sub>. The 4900 Multigas combines this monitoring power with low-cost of ownership, delivering a highly attractive analytical package.

With a compact and robust design, the small footprint of the 4900 Multigas requires minimum cabinet space and can be easily integrated into other systems, helping to reduce installation costs. Low operational requirements, facilitated through long calibration intervals by ultra-stable, high performance measurement technologies and autocalibration capabilities, make the 4900 Multigas an ideal monitoring solution with an affordability to match its impressive monitoring performance.

Using the same reliable measurement technology as the SERVOPRO 4900, the new 4900 Multigas is backward-compatible with existing installations, providing trusted gas analysis while offering the advanced digital communications that many modern systems require.

#### **FLEXIBLE**

- Provides a complete continuous emissions monitoring solution for flue gas analysis
- Ideal for criterion pollutant and greenhouse gas monitoring: % level O<sub>2</sub>, CO<sub>3</sub> and CO, plus ppm level SO<sub>2</sub>, NO, CO, CH<sub>4</sub> and
- Continuous multi-gas monitoring
- Digital communications for remote access: RS232/RS485 Modbus, PROFIBUS and Ethernet (Modbus TCP/IP - to follow)

## **EASY TO USE**

- Small and compact: designed for simplified integration into existing systems and easy fit into a cabinet
- Auto-calibration facility
- Intuitive-use icon-driven color touchscreen for easy device interaction and configuration
- USB serial port for data logging and software upgrades

## LOW COST OF OWNERSHIP

- Reduced ongoing operational needs facilitated by auto-calibration function
- Extended calibration periods from ultra-stable, industry-leading Paramagnetic and SBSW IR and Gfx IR sensing technologies

## UNRIVALLED PERFORMANCE

- Non-depleting sensors for ultra-stable, accurate and selective measurements
- Manufactured by Servomex over 60 years' experience innovating and pioneering gas analysis and thousands of units used in the field every year

#### BENCHMARK COMPLIANCE

- In compliance with Low Voltage, EMC and applicable EU Directives
- Certified to MCERTS (EN15627-3) and QAL 1 (EN14181) -O<sub>2</sub>, SO<sub>2</sub>, CO and NO

## PRODUCT OVERVIEW: 4900 Multigas

## A COMPLETE MONITORING SOLUTION FOR CEMS GAS ANALYSIS

For industries and processes including power generation, petrochemical, refining, waste incineration, iron and steel, pulp and paper, and cement manufacture, continuous emissions monitoring is a regulatory requirement. The solution must be capable of offering the highest sensitivity and accuracy when dealing with multiple measurements for pollutants and greenhouse gases. No matter what your application needs, you'll want a solution that's easy to install and operate, while delivering attractive affordability. And we don't believe you should have to compromise.

## A NO COMPROMISE SOLUTION

The 4900 Multigas meets all your CEMS requirements through a specific design and feature set optimized to continuous flue gas emissions monitoring applications. This compact, small-footprint analyzer integrates effortlessly into your established systems and, when used with the correct sampling system, delivers high grade multi-gas monitoring of criterion pollutant and greenhouse gases (% O<sub>2</sub>, CO<sub>2</sub> and CO, plus ppm SO<sub>2</sub>, NO, CO, CH<sub>4</sub>, and N<sub>2</sub>O). The 4900 Multigas combines three sensitive and highly stable non-depleting technologies to deliver unsurpassed measurements you can rely on – Paramagnetic, Single Beam Single Wavelength NDIR and Gas Filter Correlation NDIR. In addition to its performance, the 4900 Multigas also comes with analog/ serial outputs, with digital communications protocols Serial Modbus, PROFIBUS, and Ethernet (Modbus TCP/IP - to follow) for added flexibility in configuration and set-up. For measurements that need to analyze and speciate NOx, NO and NO<sub>2</sub>, a NOx converter can be included.

## SIMPLE MAINTENANCE AND REDUCED ONGOING COSTS

Added to its considerable measurement performance and stability, the 4900 Multigas delivers highly attractive cost reductions over product life. Not only is this device optimized for easy set-up and flexible integration, but an auto-calibration function permits easy, low-cost remote calibration. The 4900 Multigas allows diagnostic values to be exported for early detection of problems for preventative, or even predictive maintenance.

### **ALTERNATIVE PRODUCTS**

The Servomex product range features a variety of options designed to meet your application needs.

## **MiniMP** 5200

The MiniMP 5200 is ideal for portable gas analysis of O<sub>2</sub> when EN15267-3 MCERTS approval is required. Optimized for CEMS testing, the MiniMP combines leading-edge gas analysis with simple, intuitive use and reduced ongoing maintenance.

## **SERVOPRO** NOx (O)

The versatile SERVOPRO NOx gas analyzer uses the time-proven chemiluminescence detection method to measure NO or NO/ NO<sub>2</sub>/NOx concentrations all in one analyzer – perfect for continuous monitoring for industrial stationary sources emissions or ambient air, and fast enough for emissions testing in engines and vehicles.

## **SERVOPRO**

For industrial applications that require ultralow emissions monitoring of sulfur dioxide, the SERVOPRO SO<sub>2</sub> is the ideal solution, utilizing ultraviolet (UV) Fluorescent technology to deliver a continuous measurement you can rely on.

## **KEY APPLICATIONS**

- Utility boilers
- Clinical waste incinerators
- Chemical incinerators

- Crematoria
- Mobile labs
- Research into greenhouse gases

### **DEVICE SPECIFICATION**

#### Size:

- 132.5mm (5.2") high 481.6mm (19") wide 544.2mm (21.4") deep
- With expansion chassis, height is 265.5mm (10.5")

## Weight:

- Main unit: approx 14kg (30.9lb)
- Expansion chassis: approx 13.7kg (30.2lb) (dependent on number and type of sensors used)

## **Operating Temperature:**

 $= 5^{\circ}\text{C} - 45^{\circ}\text{C} (41^{\circ}\text{F} - 113^{\circ}\text{F})$ 

## Warm Up Time:

Warm up time is typically 24 hours from cold start at 20°C (68°F), may be longer for the higher sensitivity measurements.

#### **Power Requirements:**

100-240V ac, 50-60 Hz (± 10% maximum fluctuation)

#### Sample Gas Connections:

	Sample inlet	Sample outlet
Infrared (SBSW)	1/8" NPT female	1/4" NPT female
Paramagnetic	1/8" NPT female	1/4" NPT female
Infrared (GFx)	1/8" OD stainless steel stub	1/4" NPT female

#### Certifications:

- EN 61010-1: Safety requirements for electrical equipment for measurement, control and laboratory use
- EN 61326-1: Electrical equipment for measurement, control and laboratory use
- EMC requirements
- Installation Category II rated in accordance with IEC664
- Certified to MCERTS (EN15627-3) and QAL 1 (EN14181) - O<sub>2</sub>, SO<sub>2</sub>, CO and NO

These analyzers are not intended for any form of use on humans and are not medical devices as described in the Medical Devices Directive 93/42EEC.
