About us

From its humble origins in 1983, the Halal Quality Control Group has broadened its reach from a single hometown in The Netherlands to over 13 nations, extending tailored services to each region with a dedicated focus on Halal certification.

Today, we stand as one of the global leaders in Halal certification, fuelled by a vision to bring simplicity and accessibility to the Halal industry for all who seek it.

We serve a wide spectrum of sectors, offering them vital solutions to connect with a burgeoning industry they might not have been able to access otherwise.

But turning a vision into reality hasn't been a smooth journey. It called for mastering public relations, gaining recognition, securing accreditations, forming alliances, building market trust, and establishing efficient systems.

Our Ecosystem

We are available in 14 countries.
And growing.

Unique in this industry, we have operational offices spanning from The Netherlands to the United Arab Emirates.

HQC is operational in:

The Netherlands, Belgium, France, Germany, Denmark, Austria, Spain, Italy, Poland, Ireland, Greece, Hungary, Jordan, and the United Arab Emirates.

14

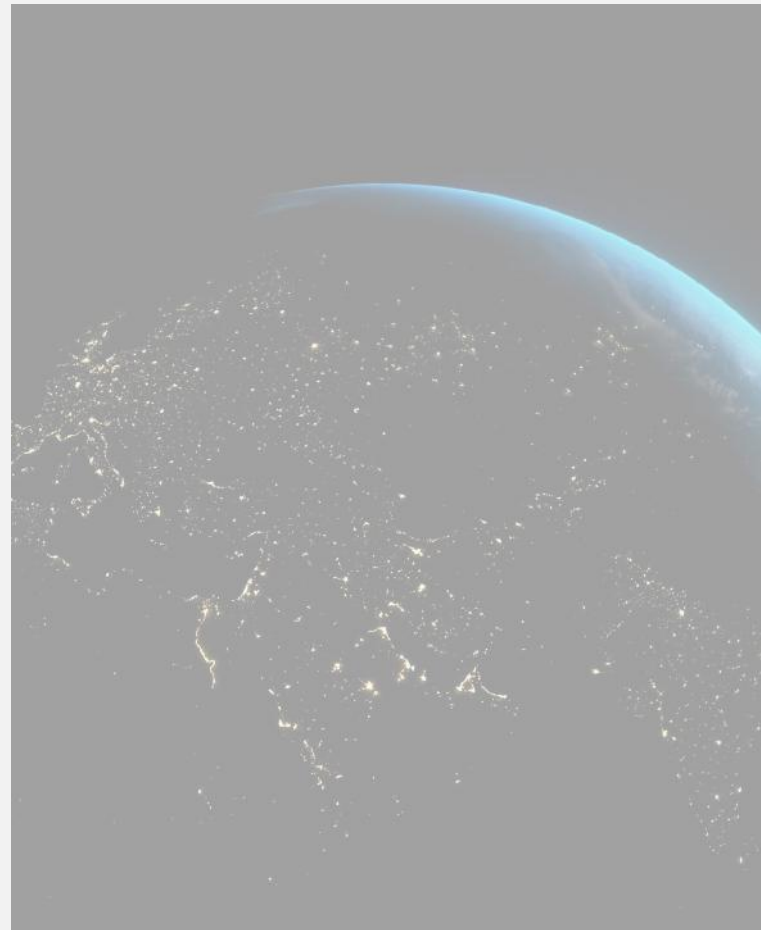

Offices available, with each having independent accreditation.

Brand covering your solutions.

Accreditation and Recognition

In today's global market, companies must have a diverse range of accreditations and recognitions to meet customer expectations and ensure seamless trading.

The Halal Quality Control Group is committed to providing comprehensive solutions that enable businesses to overcome these challenges.

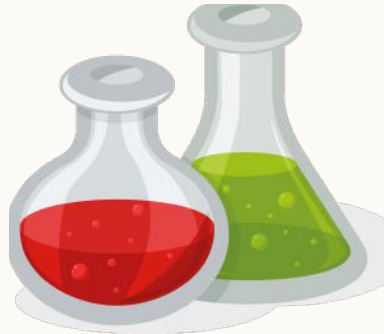

-  Indonesia
-  Malaysia
-  Singapore
-  Saudi Arabia
-  United Arab Emirates
-  And many more

Target Audience

Food and Beverage

Halal Quality Control is able to service most F&B industries, ranging from fresh and frozen meats, processed meats, dairy, confectionery, ingredients, sauces, and many more.

Non-Edibles

We also do serve industries such as chemicals, flavors, fragrances, additives, processing aids, cleaning aids, and many more.

Service Providers

Service providers could be vital to the supply chain. Storage, logistics, toll manufacturing packaging, catering, and tanking are able to be Halal certified.

Our Clientele

Customer First.

At Halal Quality Control, customer satisfaction is at the top of our agenda. We believe that good customer service is key to a successful business.

Over the years, we have build an impressive clientele to proof our dedication for customer service. Halal Quality Control is able to service any industry as long as the process is eligible for Halal certification.

HQC Schemes

As your principal roadmap, these schemes delineate the essential criteria and procedures for securing Halal certification while fostering an effective system.

HQC has crafted five distinct schemes to accommodate various industries.

- 
- 1 Halal Certification Scheme
 - 2 Halal Assurance Program
 - 3 Animal Slaughtering and Awareness
 - 4 Service Providers Scheme
 - 5 Supervision Scheme

Our Services

Halal Factory Certification

This is considered a general Halal certification for one or multiple production or service sites. It includes a list of approved products and is valid for one to three years.

Halal Shipment Certification

This is considered a Halal certification for a single shipment. It includes the products approved to be exported.

Audits

Through our comprehensive yet collaborative auditing service, we empower your food and beverage business to reach its fullest Halal-certification potential, ensuring not just compliance but also your competitive edge in the market.

Halal Training

Despite the growing demand for Halal certified products, there exists a gap that often inhibits businesses from achieving Halal compliances effectively.

HQC solves this gap by providing tailor-made courses carried out by our training partners.
