hd ML32i

LineArray Stick with excellent sound characteristics for acoustically sophisticated areas

The hd ML32i is a passive 1-way column speaker with an elegant look and excellent sound characteristics. The 32 2" broadband chassis produce a cylindrical wave radiation characteristic up to the highest audible frequencies. The resulting higher throw range and better speech intelligibility compared to conventional column loudspeakers predestines the hd ML32 LineArray Sticks for use in acoustically difficult environments such as churches, airports, conference rooms or halls. The large range of up to 30 m and horizontal coverage of 100° ensures efficient sound solutions with only a few speakers. The 2" chassis are the best choice for human voice reproduction due to their low diaphragm weight and nearly the same size as the human vocal cords. The M6 square nut through-hole mullion on the back of the speaker allows mounting of all mounts. Internal clamping connections ensure a tool-free and quick connection of the loudspeakers. For optimum adaptation to the room architecture, the loudspeaker can be customized in all RAL-Color and special length.
