

**SEEDLINGS WITH SIBLINGS  
CALL FOR PARTICIPATION**

**Register by 27 April (Sound Art Workshops)  
Register by 28 April (Ukulele Workshops)**

Within the frame of Seedlings with Siblings programme, we are holding two workshops at HAUNT Frontviews. Using sound and music, we will revisit the topic of social silver lining through the networks of plants that have surged to takeover HAUNT's concrete, asphalt and cobblestoned backyard. With a microcosmic attitude, we are getting familiar with every tree, bush, moss and weed in this "hidden" garden of plenty. And with a meticulous attention to the detail, collaboratively, we will discover each plant at this garden. To honour the bounty, we will be creating a visual and sonorous inventory and devote each week of workshops, performances and talks to everyone one of them.

**SEEDLINGS WITH SIBLINGS Sound Art Workshops  
facilitated by Roberta Busechian**

Roberta Busechian will hold series of bio sonic/ sound workshops. In this collaborative experimental journey, we will be working with the plants, using various methods to identify them, paying meticulous attention to their details and their natural and architectural surroundings through various kinds of mics and equipments.
