

	Quality Management System	Rev. date: 01/06/2023
	Content: Quality Policy	Rev. no.: 10
		Proc. no.: HBC-GEN-QUA

1. Introduction

HBC Group as of 1st of May 2015 consists of two entities:

- **Hyperbaric Consult A/S (Denmark)**
- **Hyperbaric Consult Ltd. (UK)**

and aims to carry out works according to the Clients' specifications and to a high standard of workmanship. Quality goals and objectives have been defined in order to assess the performance.

HBC Group is dependent on high quality performance from hired personnel, Subcontractors and Suppliers, therefore all will be evaluated in order to ensure the correct and professional execution of their tasks.

Deviance from the expected standard and specifications will be rectified as soon as reasonably practicable and openly informed to the Client.

HBC Group is subject to all rules and regulations of the **ISO 9001/ 14001/ 45001** standards.

2. Leadership

The Managing Director has the overall responsibility in relation to the quality of the service. Part of the responsibility is delegated, according to QMS, to:

- QHSE Manager // QHSE Assistant // Site Managers

The core responsibility lies with the top management of the HBC Group and the QHSE Revision Board. Managing Director and QHSE Manager provides a point of reference for Site Managers with ref. to ISO 9001:2015 standards.

3. Our main objectives

1. HBC Group must appear as an attractive, reliable business partner that complies with the agreed commitments, which includes the expectations generated by the customer, through brochures, offers and demands specified and accepted for the specific order
2. HBC Group's services must always appear and be perceived as quality products
3. HBC Group's quality is ensured through close cooperation between customers, suppliers and Group's quality policy and Quality Management System
4. Overall quality is regarded as a crucial factor in ensuring the growth of the HBC Group
5. Quality Management System's efficiency is continually improved

4. Goals:

HBC Group adhere to continuous development process. In order to measure and assess the process - Quality goals along the HSE goals are set, in force and monitored via QMS.
