

DIGITAL FIKA

Hand in Hand for Women was established in order to support women's rights and solidarities. Nowadays, HIHFW wants to come together with the women by means of a new project.

Over the period of quarantine due to Covid-19, HIHFW wants to give a start to the project 'Digital Fika' in order to contribute to immigrant women's social interaction and support their language learning. This project will bring women together in order to speak Swedish online using computer or mobile phone. Different applications such as zoom, skype, whatsapp etc. are going to be used via internet for the online meetings. One will be able to practice Swedish while at the same time she is drinking coffee at home. So, we, the women, will continue improving ourselves and learning Swedish.

Our purpose with this project is to provide an opportunity for women to come together with the other women who are at the same language level and to practice Swedish. Each group will consist of 3-4 women in total. 2-3 of them will be the ones willing to practice Swedish and 1 will be a native speaker who wants to teach Swedish. Each group will meet online at least once a week and the group members will decide on the date and duration of the meeting themselves.

We, the women, want to make use of the quarantine period well by making good friends and spending quality time together.

We invite you!

All the Swedish women reading our invitation. We, the immigrant women, are not able to learn Swedish sufficiently without your help. Please, support us!

We invite you!

All the immigrant women who want to speak Swedish courageously throughout your lives in Sweden.
