7056i MFP / 8056i MFP

An employee who is all you could wish for – versatile, productive, discreet and fast!

These days, increasingly higher and extensive demands are being made on b/w multifunctional systems. We're able to offer you two employees that can help you master this situation: the MFP 7056i and the MFP 8056i. They feature a high resolution for brilliant printouts and detailed scans, always have a large supply of required paper types, formats and paper weights and can be optionally extended with finishers, Solution Packs or your own software. Despite all this, we've not neglected the issue of security. Naturally, we've placed great emphasis on security in both systems. The MFPs are operated via a large, colour touch display that can be individually adapted.

What you can expect:

Best print results: The new b/w systems now operate at a high resolution of up to 1,200 dpi. This ensures that fine lines, line drawings, degree dissertations and also simple office documents look sharper and more professional. A newly developed toner, which is used in both MFPs, also comes into play here. Thanks to its even application, this really causes a sensation – even when printing in black and white.

Perfect speed: Even large-volume print jobs won't waste your valuable time. The 8056i, for example, can output up to 80 A4 and 40 A3 pages per minute. The warm-up time of approx. 30 seconds is short and the first copy starts after 5.2 (7056i) or 4.7 (8056i) seconds. And scanning too – with a maximum of 220 image pages per minute for duplex, b/w templates – is now faster than ever before.

Unbelievable print volume: A total paper capacity of 7,650 sheets* from up to eight paper feeds* is available to the two b/w MFPs. This ensures that large print jobs do not continue for longer than is necessary as a result of a shortage of paper. Thus, the various paper types and thicknesses in the new SoftSlide cassettes can be processed in a single job. Special formats up to A3+ (305 x 457 mm), paper weights up to 300 g/m² and banner paper are not a problem either. You can also select various finishing options* for brochures or letters with tri-folding.

Extremely adaptable: An innovative HyPAS interface, special Solution Packs* and other optional software solutions can be used to adapt the systems to your individual requirements. Recurring jobs can be called directly from the respective system's memory. Naturally password-protected: If the printer you require is occupied, Follow-Me-Printing* comes into effect and your print job is executed on another system. The MFPs can also be addressed via WLAN and with mobile end devices such as a smartphone or tablet. Apple AirPrint, CloudConnect and the free MobilePrint app are available for this.
