Flextile-4 frame KIT
80 | 100 | 120

PREMIUM by Spennare

A revolutionary portable modular system! Multiple patents and awards for design and engineering. The Flextile frames can be folded and unfolded with the printed fabric mounted on the frame. Once the graphic is installed you never have to remove it or reinstall it again! Stack vertically and connect horizontally, simple and intuitive but very capable. Build everything from a simple tabletop, to a larger backwall, to towers, to counters, to larger spaces. Each carry bag can hold up to 4 frames, 4 connector rods, 4 foot rods, and 1 top connector.
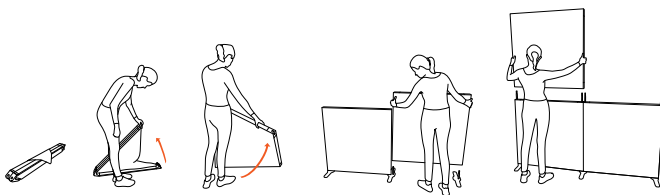

Covered by Spennare's Lifetime Warranty.

*Easy to build and modify*

Weight	14	17	20 kg
Size	160x160	200x200	240x240 cm
Versions	Build 45° and 90°-ancles
Graphics	4 pcs 80 cm	4 pcs 100 cm	4 pcs 120 cm
Acc.	LED-spotlight, Foot plate
	Angled Top Connectors

Flextile

Mulitple options

Using the same amount of frames you can alter your Flextile in the best way suitable for a specific event and provided space. Create different configurations and combinations, a straight back wall can also convert to multiple tabletops, or separate displays and a tower.

Flextile is the ultimate solution for messaging flexibility since you can choose between below options for printed graphics.
One graphic per frame
The easiest set up. The graphics are already installed in the frames. Assemble a small display in just a few minutes.

One graphic over four frames
A larger graphic that spans across multiple frames, front only or double sided. The SEG graphic inserts easily into the grooves of the frames.
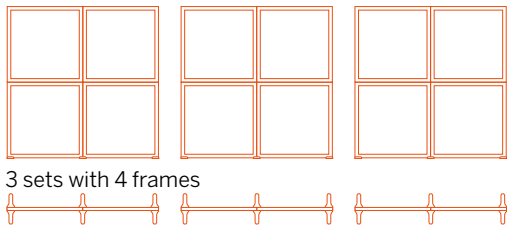

Double sided pillow case
The pillow case graphic pulls over the Flextile display using a stretch fabric. No more rounded corners, no more pile of aluminum pipes. A pillow case display made simpler and better.
Flextile

Flextile comes as standard (but not required) in bags that contain four frames. This set of four frames is a simple but complete kit for a 2x2 backwall. By combining several frames and accessories, you can build many different combinations. Here are examples of what you can build with three 100cm sets. Since the frames are square, you can build the same things with 80cm or 120cm frames.

3 sets with 4 frames

Floor area 3x2 m

Wall area 5x3 m

Wall area 4,5x2 m

Floor area 4,8x1,8 m

Floor area 1x1 m

Wall area 6x2 m
