

HOME COMFORT  
HEALTHCARE

Dedicated To Improving The Lives Of  
All Those We Serve.

# ABOUT US

Providing compassionate care to families has been the mission of Home Comfort Healthcare since its founding in 2019. Our home care service is dedicated to giving you or your loved one the highest level of care and assistance available at all times.

Our pledge to you is straightforward: we'll assist you or a loved one in continuing to live in their home, and we'll assist you in achieving peace of mind.

We at Home Comfort Healthcare realise that you are looking for high-quality in-home care for yourself or a family member. In search of a skilled, professional care provider who will treat you with dignity and respect, you've come to the right place.

We are a home care company that thrives to meet all of your requirements. The training and skills you seek are available to us because we are professionals in the field. We have carers who will meet all of your loved one's health and well-being needs.

# Our services

## Live-in care

Our private live-in care provides round-the-clock care from a committed carer who lives with you in your home and is available to provide a helping hand at any time.

We recognise that being supported by or caring for a loved one with care requirements can be stressful at times. As a result, our private live-in care is tailored to your specific needs, routines, and preferences.

With Home Comfort Healthcare's private live-in care, you and your loved ones can focus on what matters most: spending quality time together.

## Domicilliary care

Home Comfort Healthcare provides a variety of domiciliary services to individuals in their own homes.

Those who require extra assistance with day-to-day domestic tasks, personal care, or any other activity that allows them to preserve their quality of life and independence. We offer ongoing assistance that is tailored to your specific requirements and habits

Many families prefer domiciliary care since it puts them back in control of the assistance they get. Our care plans are totally tailored to you, with one-on-one personal attention starting at 30 minutes per week and increasing to numerous visits per day or overnight support.

## Night Support

Night care is when a carer stays in your house overnight to help you keep your daily routine.

Night Care gives people access to skilled specialists all night long to help with even the most difficult care needs.

Our nursing-led carers also provide night care so that you or your loved one can slumber peacefully throughout the night time hours.

If you or a loved one is uncomfortable being left alone at night, you may require night care. One of our fully trained night carers is available to help with things like going to the bathroom, giving medications, and moving the bed.

## Specialist care

When significant and chronic health problems impact you or someone you care about, you may believe that assisted living or a nursing home are your only options.

However, the familiarity and comfort of home can have a significant impact on one's quality of life. Fortunately, we provide specialised care that can assist you in meeting your medical needs at home. Without the hospital, it's quality, one-on-one treatment, support, and attention.

Best of all, qualified health care specialists from Home Comfort Healthcare are hand-picked to meet your loved one's condition, whatever it may be.

## Palliative Care

We understand that caring for a loved one nearing the end of life can be both emotionally and physically exhausting. It is obvious that the end of life affects not only the person who is dying but also all of their loved ones.

We will assist you in caring for your loved one and managing your household affairs so that you can spend quality time together as a family.

This includes helping around the house as well as providing emotional and moral support to the family.

# Respite Care

Family carers and their loved ones can benefit from respite care. Short-term or temporary care giving visits are common in this sort of home care. These visits allow family carers to take time away from unpaid care giving chores without jeopardising the level of care their loved ones get.

Family carers and their loved ones can benefit from respite care. Short-term or temporary care giving visits are common in this sort of home care. These visits allow family carers to take time away from unpaid care giving chores without jeopardising the level of care their loved ones get.

## Who we care for & support

We help people with a variety of disabilities, including but not limited to:

- The normal ageing process
- People with any kind of physical, mental, or emotional problem, such as Alzheimer's and dementia
- Individuals suffering from various diseases or impairments:
- Those who are recovering from an injury, surgery, or disease and require assistance during their recovery and rehabilitation.

*We offer both part-time and full-time, 24-hour care. Our home care gives you peace of mind by providing security, safety, and supervision.*
