

THE HOME RIVER BIIBLITZ

Program

The Home River Bioblitz is an event that consists of three elements. Between the 23th and 25th of September, we all go out and EXPLORE our home river environments and their inhabitants. Between the 26st of September and 2nd of October, we will IDENTIFY the observed species with the support of the iNaturalist community. On the 3rd of October we will CHAT about the worldwide observations and experiences made during an online recap of the event.

Workshops

We care about the reasons that you go out there on this day, as much as we care about the biodiversity you will encounter during your Home River Bioblitz. People around the world are standing up to protect and celebrate their local rivers and we hope this worldwide event helps to bring these people together. With the workshops, we raise awareness of the need for diversity and inclusivity in environmental movements, we work towards more impactful citizen science and we help you tell your river story. More information in the guideline below. The different workshops and talks we offer are optional and you will receive official invitations once registered for the Home River Bioblitz.
