## Introducing Brinsea's new TLC Series II

March 2022 will see Brinsea launch the Series II versions of its popular TLC-40 & 50 brooder/Intensive Care Units. All models in the range have additional useful features and the new Zoologica model is specifically designed for exotic bird breeders; in particular providing wider and more refined control of humidity. The portable TLC-30 models remain unchanged.

The TLC-40 & 50 models remain high-performance, dual-purpose ranges. The Eco and Advance models are ideal as all-round bird brooders or intensive care units which are particularly suitable for small animal rescues and breeders. Brinsea have listened to their customers and introduced additional features such as variable fan speed allowing the user to adjust the setting for particularly stress-sensitive animals.

With hygiene a top priority, all models have been carefully designed to make cleaning as easy as possible. Brinsea incorporate Biomaster™ Antimicrobial Protection into all of our TLC cabinets during manufacture. Biomaster Protection is embedded within the plastic itself which prevents the growth of harmful bacteria helping to provide the optimum environment for recovery.

for 2022

# TLC Series II

The two new Zoologica models incorporate fully automatic humidity control and will reach at least 65% RH\*. These units have many useful features including an internal light, temperature and power fail alarms and variable fan speed. These models are particularly suited for avian exotics.

The increased humidity capability is achieved with improved door fit, increased evaporating surface and the use of polycarbonate for the door which retains its flatness under high humidity. Note that the nebuliser fitting to the Advance model limits maximum humidity achievable to approximately 60%\*.

## TLC SERIES II: NEW FEATURES •

|                             | TLC ECO | TLC ADVANCE | TLC ZOOLOGICA |
|-----------------------------|---------|-------------|---------------|
| Digital temperature control | •       | •           | •             |
| Display choice of °C or °F  | •       | •           | •             |
| Digital humidity display    |         | •           | •             |
| Digital humidity control    |         |             | •             |
| Water pan for humidity      | •       | •           | •             |
| Temperature alarm           | •       | •           | •             |
| Room temperature alarm      | •       | •           | •             |
| Increased humidity range    | •       | •           | •             |
| Light                       |         | •           | •             |
| Variable fan                |         | •           | •             |
| Nebuliser fitting           |         | •           |               |
| Antimicrobial plastic       | •       | •           | •             |

Note that the TLC-40 and 50 Advance Series II models no longer have the option of fitting a humidity pump, this feature is now incorporated into the new Zoologica model.
