

FortiBoost Pet Tab

Complementary feed

Fortifying tablet

For puppies and dogs

PROPERTIES

In **critical growth phases**, the body is in great demand. Needs for vitamins and trace elements are bigger than usual. **FortiBoost Pet** brings chelated trace-elements and vitamins to fulfill these specific needs.

FortiBoost Pet also contains high quality aminoacids from yeast and algae (spirulina). Plant extracts (nettle and *Panax Ginseng*) help to fight fatigue.

FortiBoost Pet is **highly** palatable, thanks to its innards flavor and high yeasts content.

WHEN CAN I USE FORTIBOOST Pet

FortiBoost Pet is useful in critical phases, or in case of tiredness. It completes a balanced diet.

- Work, active leisure
- Recovery phase after vaccination, disease...
- Mid season fatigue (autumn, spring)

DIRECTION FOR USE

Oral route, give it to the dog that will take it voluntarily or put it at the top of the feed.

- For puppies over one month: 1 tab per 5kg daily
- For dogs: 1 tab per 10kg daily

Before use or extension of use, it is recommended to ask for the opinion of a specialist.
