UNCOMPROMISING HYGIENE

UNCOMPROMISING HYGIENE WITH VIPIBAX

Professional environmental hygiene is essential in the fight against infectious diseases. The ViPiBaX Giardia Ex Professional Line supports this quickly and effectively. Due to the short exposure time of 5 minutes, it integrates excellently into established practice processes and thus enables smooth work without unnecessary interruptions. In this way, chains of infection are prevented before they can arise.

Solutions of the ViPiBaX Professional Line are based on the demanding conditions of everyday veterinary practice. As usual, they reliably eliminate giardia and at the same time act against a large number of other, practice-relevant microorganisms.

PURECHLOR

4

PROFESSIONAL LINE
