FABRIKEN: Alla Felen E' Nån Annans - 7" Single, Download

The second release from this Swedish trallpunk project. ...or is it a band? No matter what, it's pretty good stuff. So if you miss the good old '90s when trallpunk was popular last time, then you just have to get this release.

As I mentioned when I reviewed their EP, there's members from several punk bands around Stockholm in this band. I hear that the singer is from COCA CAROLA for example.

Digital release date: September 27 (it's already out on vinyl)
