

BOWE2H IN-PERSON EVENT

Offshore wind and green hydrogen in Germany: national and transnational innovation

22 May 2023 | 13:00-18:00 | Berlin

IKEM, Magazinstraße 15-16,
10179 Berlin, Germany

12:30 - 13:00	Doors open, networking and coffee
13:00 - 13:10	Welcome and event moderation & Introduction to BOWE2H Anika Nicolaas Ponder and Dàmir Belltheus Avdic IKEM
13:10 - 13:30	2030 and beyond: Germany policy and targets for offshore wind and hydrogen Andreas Mummert Department Head at Foundation Offshore Wind Energy
13:30 - 13:50	Leading by example: Offshore wind and green hydrogen development in Mecklenburg-Vorpommern Olaf Fiesel Department Head at the Ministry of Economics, Infrastructure, Tourism and Labour of Mecklenburg-Vorpommern
13:50 - 14:10	Small space, big goals: Germany's maritime spatial planning for rapid offshore wind roll-out Ulrich Scheffler Federal Maritime and Hydrographic Agency (BSH)
14:10 - 14:30	Up to the challenge: Industry perspective on offshore expansion goals Dr Joyce von Marschall RWE
14:30 - 14:50	Coffee break
14:50 - 15:10	Clean water for green hydrogen Nicolas Heyn Terrawater Technologies
15:10 - 15:30	Better together: Transnational projects and interconnectors in the Baltic Sea Dr Paul Nahmmacher 50Hertz
15:30 - 16:00	Panel discussion Moderated by IKEM
16:00 - 16:20	Snack break
16:20 - 16:40	New horizons: Hydrogen, heat and infrastructure Speaker (tbc) HH2E
16:40 - 17:30	Co-creative exercise moderated by Anika Nicolaas Ponder IKEM
17:30 - 17:45	Summary of the event
18:00	End of the conference

About BOWE2H

Connecting authorities, policy-makers, researchers, manufacturers and other experts to bring together offshore wind and hydrogen energy systems across borders

With a potential of 93 GW (BEMIP) in the Baltic Sea, offshore wind energy could be the foundation for a secure, future-oriented, green regional energy system. But as isolated offshore wind and hydrogen projects are slowly developing, a transnational network and perspective to unite local governments, developers, grid experts, researchers, manufacturers and policy-makers is lacking. Stakeholders need access to regional knowledge and to their expert counterparts from other countries to increase understanding and capacity to act transnationally.

BOWE2H answers this need with a stakeholder network that hosts six regional expert events, and co-creatively produces a Strategic Roadmap for Regional Offshore Wind and Hydrogen Development. The kick-off -and the final conference will be virtual, and four national events (including co-creative workshops) will be held in the up-and-coming markets for offshore wind in the Baltic Sea, i.e., Poland, Lithuania, Sweden, Germany.

The event network will enhance stakeholders' capacity to act by providing them with a better understanding of the necessary policy, grid, investment and research framework for offshore wind and hydrogen project development, and by connecting them with other stakeholders for further cooperation. The Roadmap, built from a metastudy, interviews with expert stakeholders at the national events, and results from the co-creative workshops, will be distributed among stakeholders and beyond.
