

CZUR Smart Book Scanner M3000 Pro V2

- Model launched in September 2022.
- This introduction updated in October 2022.

Every Page is Scanned Precisely with Utmost Care.

You, and your precious book, deserve the best.

Designed as overhead style, the M series ensures no pressure will be placed on the materials during scanning, meaning the materials will be preserved as the best as possible.

Since released, the M series has impressed the market with its capture quality, productivity and material flexibility.

In the year of 2022, We decided to offer a more advanced model under M series, a model with speed up to 1.2 second per scan to CZUR enthusiasts -

The M3000 Pro V2 Professional Overhead Scanner

360 DPI

Product Overview & Package

Scanner design, package content, packing style.

M3000 Pro V2

Dimensions 505*520*425 MM

Weight 4.5 KG

Package Content - Accessories

- Instructions may not come in the package. E-version is always available on CZUR website.
- The design of foot pedal and adapter may change but function is the same.

Packing Style

* Photo under natural light.

Main Features

- * Camera, side light, OCR, TFT screen, Cradle, SDK, TWAIN driver.
- * CZUR patented software (no subscription fee).

M3000 Pro V2 has everything you need in order to scan a book efficiently.

- Laser Curve-Flatten Technology that flatten the pages automatically,
- Optical Character Recognition (powered by ABBYY) that turns pages into editable files,
- Book cradle (can be laid flat when not use),
- Auto-alignment, Smart Paging, Auto Mending, Multi-target Scanning and so much more.

You can laser scan an entire book in just minutes.

Laser Curve-flattening Technology

As the inventor of this technology and the patent owner, the curve flattening result from a CZUR book scanner is always better than our follower.

Optical Character Recognition

ABBYY Optical Character Recognition

OCR is powered by ABBYY.

An OCR engine will be able to provide the best performance with a high-resolution image produced by CZURM3000 Pro V2 scanner.

SPACE

Frank Bormon and Jim

Lovell were a late but compelling choice for TIME's Men of the Year

PIONEERS

Men of the Year reunite after 50 years to reflect on a historic moon voyage

By Jeffrey Kluger

MOST YEARS HAVE AT LEAST A LITTLE something going for them, but 1968 was awild from the start. On just the 23sd day, North Korea seized the U.S.S. Paeble, killing one sailor and holding the rest prisoner; on the 30th day, the start of the Vietnamese holkday of Tet, the Viet Cong Issunched a massive military offensive that cost more than \$5,000 lives on both sides; on the 95th day, the Res. Martin Luther King was murdered; on the 157th day, Senator Bobby Kennedy'n murder followed; on the 23gd day, Soviet army

the name day, the Democratic National Convention in Chicago descended into itolence.

The year was shaped—and soaked n—the blood that was shed. And then, as the 559th day, there was poetry. The

systems, the crew of Apoles 5—Peak bornes, Jim Lovell and Bill Anders and rockerds away from the mess at come and ventured out to the moon, become and ventured out to the moon, becoming the first thursan beings to reach and cohold our closest celestial neighbor. They arrived, as history would have a on Christmas Eve. During the eighth

their 10 orbits, they pointed a TV camera to fonce of their five windows and showed foods audience of 1 billion—nearly one of ery three people alive—the grains, flickery tudentably otherworldly sight of the annt lunar surface crawling by bellow their verses. October, when all three astronauts met with TIME to mark the 50th anniversary of their mission, at Chicago's Museum of Science and Industry, where their spacecraft is displayed. "We all agreed it was the right thing to do,"

Half a century on, there are still lessons to be learned from the mission—about enterprise, about commitment, about thow a shared undertaking larger than any individual can redeen, if not wholly heal, a fragmentod nation.

AS WITH SO MUCH about the early space program, part of what drove the decision to fly Apollo 8 was geopolitics. The U.S. and the Soviet Union had been in a footrace to the moon

since cosmonart Yuri Gagarin became the first human being in space in 1961. In the summer of 1968, wood began pinging across the intelligence web that the Soviets were going to skunk the Americans again.

"[Our flight was] going to be an Earth-orbital test of the lunar module," says Levell, also 90. "Instead we heard that the Russians were going to put a man or men around the moon by the end of 1058."

So the decision was made in Auput that Apollo 8 should get three first, giving the crew and ground team just 16 weeks to figure out how to do it. Nobody had any illusions about how dicry a plain that was, Just the year before, the Apollo spacecraft had killed autronates Gas Grisons, Ed White and Engel the Apollo spacecraft had seen and the six or made its first flight.

The Sasarn V rocket that would be needed for a moon trip—a piece of ord-nance so hage that if it blew up on the pad, it would produce a 2,500° fineball, 1,400 ft. in diameter—had had just two unmanned test flights. On the second one, it whereast on

If you use a scanner often, you must have the experience of having trouble adjusting the lighting or the scanned materials just in order to reduce the reflection when scanning glossy materials.

With CZUR side light, you just need to switch it on, the reflection will be greatly reduced!

TFT Pre-view Screen

If the user is not looking from the computer screen when under heavy load of scanning tasks, this TFT pre-view screen will be a good help making sure the scanned materials are within the scanning area.

Various Methods to Trigger Scan

Intuitive Operation

Scan in Every Way.

Hand Control

Pedal Control

Press Button Control

In-Software Control

Auto Scan

Software Function

Smart Paging, Auto-mending, Multi-target Scanning, Combine Sides, OCR...

Smart Paging

Thanks to CZUR's All algorithm, the CZUR scanner software can not only split the left/right side of a book automatically, but also flatten the book curve at the same time.

Combine Sides – Small Items

When scanning items larger than the size of A3 format, user can use the [Combine Sides] function to scan the item side by side, then stich them together to get an image of the whole item.

Or, when user is scanning an ID or certificate, and wants to have both the front and back side on the same image.

Youtube video tutorial: https://www.youtube.com/watch?v=KNglaE2tuMM
 https://www.youtube.com/watch?v=N40HzNboufU

Combine Sides – Large Items

If the files are stapled together, you don't want to remove the staple but still want to have a whole page instead of an image with a missing corner, the [Auto Mending] function will come in handy.

Auto Mending

library, to a friend's home, just anywhere. You also get a convenient ultra-safe PortaPack for carrying it

You might say, what is so unique about R? After all, any portable home scanner can be carried conflortably in a backpack! Well, that's true, but all those competitors don't have the smart software and hardware support that this unit has. It is enabled with auto-focus and auto-detection of pageturings to that you got a legible copy every trief it to more blarry stans there! Each page is scanned in within a second, and you know what, you can enjoy complete hands free operation. This scanner comes with a cool floot pedal to speed up the scanning process. It is easily the fastest scanner in the market, digitaling an entre 200 page book in less than 10 minutes.

Of course, like most other portable stanners out there, this product also has Optical Character Recognition (OCN) functionality. This functionality allows stanned pages to be converted into editable files, making the scanning work a preat deal more convenient. By the way, do you know how many harplages does it support? Prepare to get surprised This document scanner supports as many as 180 languages does it support? Prepare to get surprised This document scanner supports as many as 180 different languages. That pretty much makes it an international product suitable for use in almost any

The best part of this portable scanner is probably the patented curve-flatten technology, Books and magazines naturally have curvatures. With other scanners, you have to flatten the books by hand to get a good scan, but not with this product. The patented technology automatically eliminates the influence of curves and creates the perfect scanned copies you can get. Not only that, other benefits of this scanner include correct position, removing the fingerprint, multi-target scanning, smart, paging, and purify background. These benefits of a fect make it the best document scanner around.

It's backed by powerful software making it one of the best products suitable for home. Here's a roundup of all the actions that the software can do.

- Page-turning detection auto scan
- Smart tilt adjustment and auto-cropping
- Combining the back and front sides to create a composite scan
- Bar code and QR code recognition
- Multi-business card smart cutting and splitting
- Intelligent completion of damaged pages
- Generate PDF files in batch
- Add watermark
- Language support in over 180 languages

The scan quality is phenomenal. CZUR Shine Ultra(coupon code: CZURZO) can offer 13 full-sized megapited hi-res scans at 340 DPL it can not only scan books and documents but also a wide range of

library, to a friend's home, just anywhere. You also get a convenient ultra rafe PortaPack for carrying it when you order the product.

You might say, what is so unique about it? After all, any portable home amore can be carried comfortably in a backpack! Well, that's true, but all those competitors don't have the surface and hardware support that this unit has. It is enabled with auto-focus and auto-detection of pageturings so that you get a legible copy every time! No more blurry scans there! Each page is scanned in within a second, and you know what, you can enjoy complete hands-few operation. This scanner cames with a cool foot pedal to speed up the scanning process. It is easily the fastest scanner in the market, dictition are pattern \$200.each point [less than 10] millings.

Of course, like most other portable scanners out there, this product also has Optical Character Recognition (ODI) functionally. This functionality allows scanned pages to be converted into editable files, making the scanning work a great deal more convenient. By the way, do you know how many languages does it support? Prepare to get surprised! This document scanner supports a many at 120 different languages. That protty much makes it an international product suitable for use in almost any

OCR

Digital Files in Different Formats.

Scan once, output in a variety of different file formats.

Multi-target Paging

Auto-alignment

Blank Page Detection

If you are scanning a book with many blank pages, you can use this function to locate all blank pages and delete them all at once.

Hole Filling

If you scan items with punched holes, you can use this function to fill the holes to make the scanned page look better.

Add Watermark

You can add water marks to the scanned files using CZUR scanner software.

Antiquarian Mode

When scanning ancient books, there might be holes or damage on the item, you can use this function to fill the empty parts with a similar page color.

Visual Presenter

- Standardize file size and quality
- Set scan control hot keys
- Recognize Barcode & QR Code
- Adjustment settings: DPI, resolution, exposure, color intensity...

- Five color modes
- SDK and TWAIN support
- Multi-target scanning: Box-select areas to scan.

There' re more to discovered...
