

TRAINING BROCHURE

Course Title: ISO 45001 Training & Certification

TARGET AUDIENCE: ALL SECTORS

March 5, 2019

Lead Facilitator – Eustace Onuegbu

ISO 45001 Training Courses & Certification

What is ISO 45001?

ISO 45001 is a newly developed international standard, which outlines the requirements for occupational health and safety. The standard is applicable to organizations of all sizes, whose aim is to manage the prevention of workplace injuries, ill-health, and deaths. In addition, ISO 45001 aims to establish a safe working environment and continual improvement of occupational health and safety performance. ISO 45001 will replace OHSAS 18001 and will become the next “to go” standard for occupational health and safety.

Why is Occupational Health and Safety Management important for you?

Regardless of what industry you are in, accidents that lead to injury or health related issues will always occur. Therefore, whether you are an employee, manager or business owner, you will always share the same goal- minimize the number of casualties at work. ISO 45001 provides you with a framework to identify, control and prevent work-related injuries.

By obtaining an ISO 45001 certification you will prove that you care about the well-being of employees and that you are continually making efforts to enhance their welfare. Furthermore, you will earn a globally recognized certificate on Occupational Health and Safety Management, which will prove that you are aware of the policies and processes needed to reduce work injuries. You will also gain a competitive advantage by improving your brand’s reputation and increasing your capacity.

Benefits of ISO 45001 Occupational Health and Safety Management

By becoming ISO 45001 certified you will be able to:

- Reduce work-related injuries, ill -health and deaths
- Eliminate or minimize OH&S risks
- Improve OH&S performance and effectiveness
- Protect and improve brand reputation
- Transform operations from detection to prevention mode
- Improves compliance with current legislations

How do I get started with ISO 45001 Training?

Numerous workplace accidents, which can jeopardize the health and safety of employees, frequently take place around the world. That is why our experts will guide you through the necessary steps to implement ISO 45001 within your organization.

ISO 45001 Lead Implementer

Why should you attend?

ISO 45001 is the first global Occupational Health and Safety Management System standard that replaces OHSAS 18001. The ISO 45001 Lead Implementer training enables you to develop the necessary

expertise to support an organization in establishing, implementing, managing and maintaining an Occupational Health and Safety Management System (OH&S MS) based on ISO 45001. During this training course, you will also gain a thorough understanding of the best practices of an OH&S MS and be able to apply them to continually improve the organization's OH&S performance and ensure the well-being of employees by providing a safe and healthy workplace.

After mastering all the necessary concepts of Occupational Health and Safety Management Systems, you can sit for the exam and apply for a "PECB Certified ISO 45001 Lead Implementer" credential. By holding a PECB Lead Implementer Certificate, you will be able to demonstrate that you have the practical skills and professional knowledge to implement ISO 45001 in an organization.

Who should attend?

- Managers or consultants involved and concerned with Occupational Health and Safety Management, and Corporate Social Responsibility (CSR)
- Expert advisors seeking to master the implementation of an Occupational Health and Safety Management System
- Individuals responsible for maintaining conformance with OH&S MS requirements
- OH&S MS team members

Learning objectives

- Acknowledge the correlation between ISO 45001 and other standards and regulatory frameworks
- Master the concepts, approaches, methods and techniques used for the implementation and effective management of an OH&S management system
- Learn how to interpret the ISO 45001 requirements in the specific context of an organization
- Learn how to support an organization to effectively plan, implement, manage, monitor and maintain an OH&S management system
- Acquire the expertise to advise an organization in implementing OH&S management system best practices

Educational approach

- This training is based on both theory and best practices used in the implementation of an OH&S MS
- Lecture sessions are illustrated with questions and examples that help translate theory into practice
- Practical exercises include examples and discussions
- Practice tests are similar to the Certification Exam

Prerequisites

A fundamental understanding of ISO 45001 and comprehensive knowledge of implementation principles.

Course agenda

Day 1: Introduction to ISO 45001 and initiation of an OH&S management system

Day 2: Plan the implementation of an OH&S management system

Day 3: Implementation of an OH&S management system

Day 4: OH&S management system monitoring, continuous improvement and preparation for a certification audit

Day 5: Certification Exam

Examination

The “PECB Certified ISO 45001 Lead Implementer” exam fully meets the requirements of the PECB Examination and Certification Programme (ECP). The exam covers the following competency domains:

Domain 1: Fundamental principles and concepts of an Occupational Health and Safety Management System (OH&S MS)

Domain 2: Occupational Health and Safety Management System (OH&S MS)

Domain 3: Planning an OH&S MS implementation based on ISO 45001

Domain 4: Implementing an OH&S MS based on ISO 45001

Domain 5: Performance evaluation, monitoring and measurement of an OH&S MS based on ISO 45001

Domain 6: Continual improvement of an OH&S MS based on ISO 45001

Domain 7: Preparing for an OH&S MS certification audit

***Note:** PECB Certified Individuals who do possess the Lead Implementer and Lead Auditor Credentials are qualified for the respective **PECB Master Credential**, given they have taken 4 additional Foundation Exams which are related to this scheme. For more detailed information about the Foundation Exams and the overall Master Requirements, please go to the following link: <https://pecb.com/en/master-credentials>.*

To be considered valid, these implementation activities should follow best implementation practices and include the following activities:

1. Drafting an OH&S MS plan
2. Initiating an OH&S MS implementation
3. Implementing an OH&S MS
4. Monitoring and managing an OH&S MS implementation
5. Performing continual improvement measures

General Information

- Certification fees are included in the exam price
- Training material containing over 450 pages of information and practical examples will be distributed
- A participation certificate of 31 CPD (Continuing Professional Development) credits will be issued
- In case of exam failure, you can retake the exam within 12 months free of charge
