Sustainability Data Platform

About

Who we are.
What we've built.

Platform-first approach

Built for trust & scale

Carbon and ESG management is now mission-critical

By 2025, **90k+ companies** across Europe, UK, India and North America are legally required to report their carbon footprint.

Regulations like CSRD, SEC Climate Disclosure and BRSR Core requires companies to disclose ESG topics with assurance.

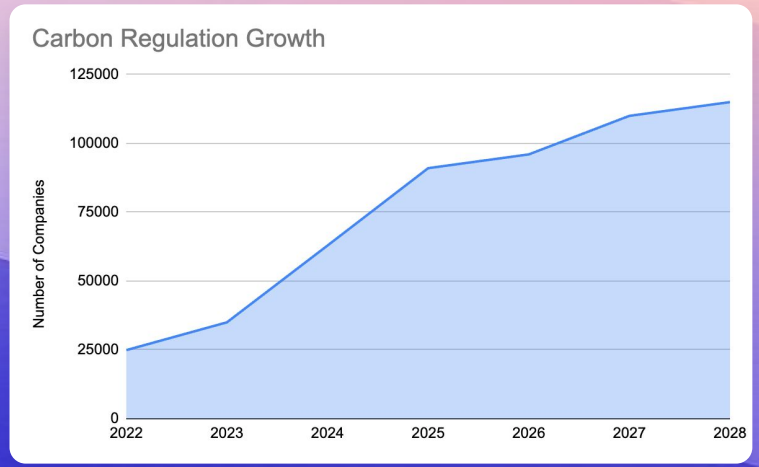

Investors expect sustainability transparency for ESG risk assessment. Failure leads to financial risks and increased cost of capital.

However, challenges include:

Unable to manage scale of sustainability data (Scope 3)

Complex and ever-changing regulatory landscape

Unstructured internal data and decision-making silos

Automated Carbon and ESG Management

1

Track

Measure and analyze carbon emissions across your organization and its value chain.

2

Report

Disclose your data aligned with the latest ESG reporting framework.

3

Act

Take data-driven action on sustainability goals for your company and value chain.

newtral

AI-powered sustainability software focused on audit-grade corporate carbon and ESG management

AI Autopilot

Scope 3, suppliers, disclosures—all automated

Modular & Scalable

Scale modules and capabilities as you grow; replace generic bloated softwares

Compliance, India + Global

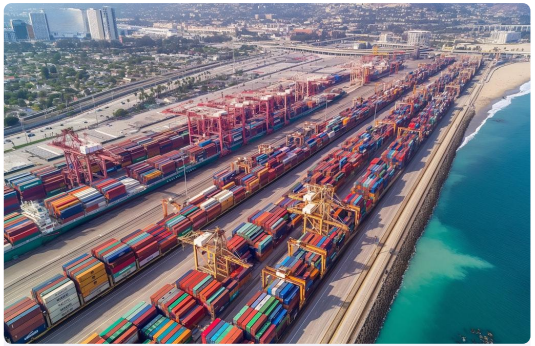

BRSR, CSRD, GRI—all pre-mapped, audit-ready

Newtral One

Best-in-class structured implementation support; driving success rate to 97%

newtral
advantages

Built for Complex Supply Chains

Works across unstructured, multi-tier ecosystems

Execution, Not Advice

Real systems, not PowerPoint decks

30-Day Time to Value

Go live in weeks, not quarters

Sustainability Data Platform

Modular by design.

Purpose-built for outcomes.

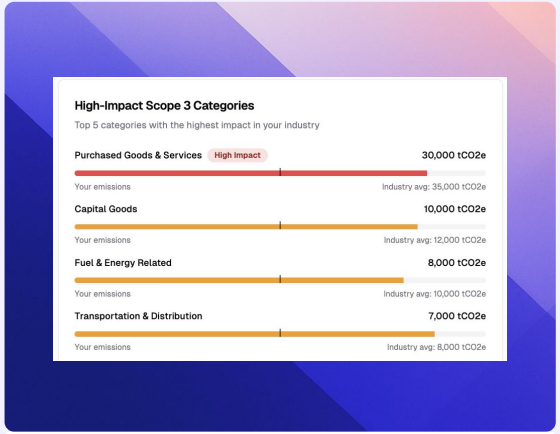

Newtral AI Platform for Enterprise Sustainability Intelligence

Platform Overview

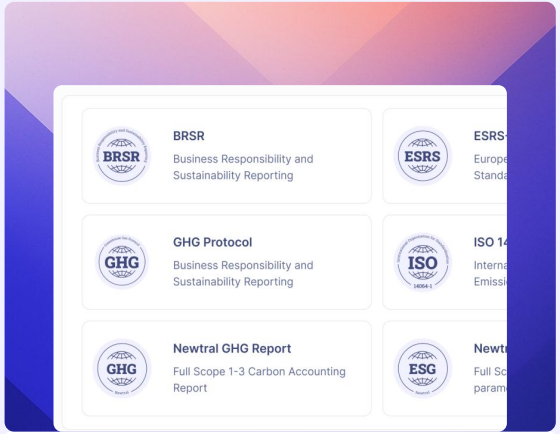

Automate carbon accounting, streamline regulatory reporting, and manage ESG performance across Scope 1, 2, and 3 — from facility-level data capture to value chain risk assessment — all in one unified platform built for enterprise scale and audit-readiness.

Start with proven workflows, purpose-built for your industry

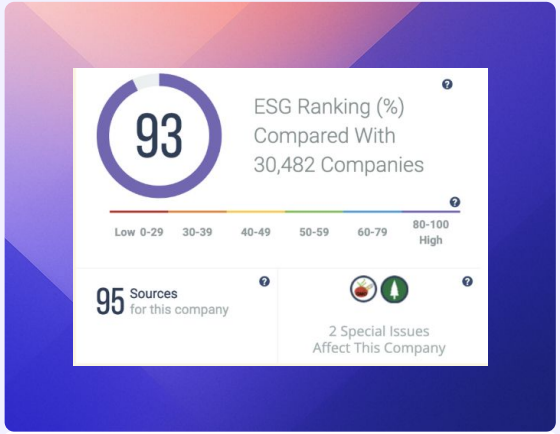

Scope 3

Automate supplier data, map emissions, and streamline Scope 3 workflows.

Sustainability Reporting

Simplify BRSR, CSRD and GHG reporting with a unified compliance system.

Supply Chain Decarbonisation

Assess supplier data, flag risks, and drive targeted emission reductions.

The Engine Powering Your Scope 3 Strategy

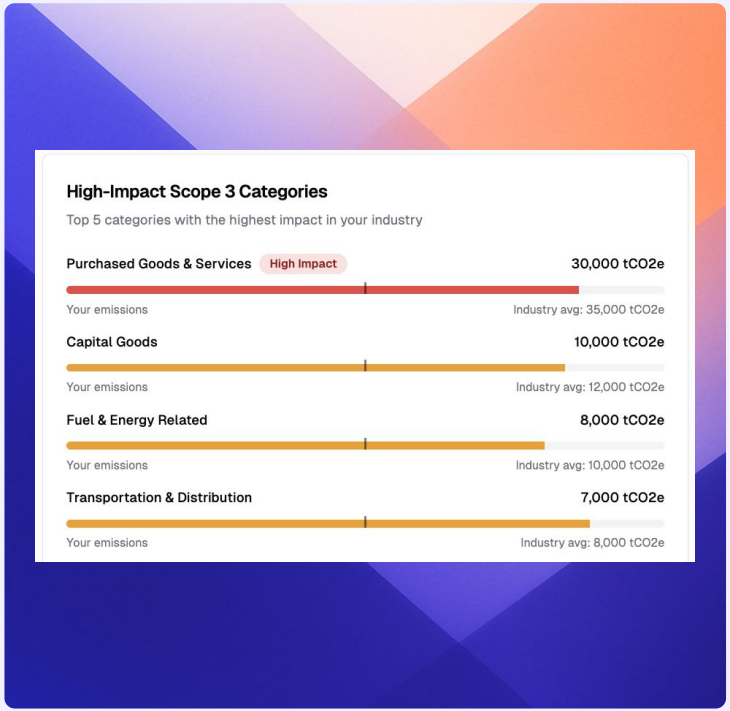

Newtral's Scope 3 Module replaces spreadsheets with structured, automated workflows—built for real supplier data and accurate emission estimates.

Map all 15 categories, prioritize high-impact areas, and track Scope 3 at scale—without manual back-and-forth.

★★★★★

"We finally stopped chasing suppliers manually. This system gave us data clarity and process ownership."

Metro Brands Limited

Prioritize What Matters
Focus on high-impact Scope 3 categories based on materiality and industry relevance.

Automate Deeply
Minimize manual work with automation across data ingestion, category mapping, and emission calculations.

Stay Methodology-Aligned
Supports GHG-aligned methods across categories—spend-based, activity-based, average-data, and supplier-specific.

Your Compliance Engine for ESG Reporting

Newtral's Sustainability Reporting Module simplifies regulatory and voluntary disclosures—across BRSR, CSRD, GRI, and other leading frameworks.

Pre-mapped templates, indicator alignment, and audit-ready outputs help you report faster, more accurately.

★★★★★

We went from scattered data to structured disclosures—without chasing teams or hiring consultants.

Wockhardt Limited

Disclose with Clarity
Auto-generate ESG reports with structured, traceable data flows

Unify Frameworks
Map indicators once, reuse across frameworks like BRSR, CSRD, GRI

Stay Audit-Ready
Built-in logic, history, and evidence tracking for audit and board review

Make Your Suppliers Part of the Sustainability Equation

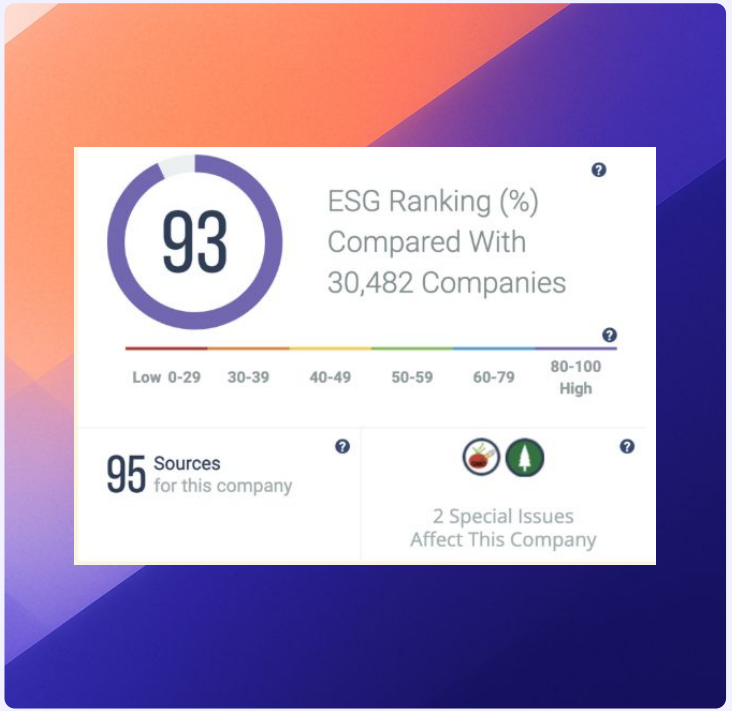

Newtral's Supplier Intelligence Module helps you assess, engage, and track supplier sustainability performance across your value chain.

From collecting ESG data to scoring supplier risk and surfacing insights—this module simplifies value chain visibility and action.

★★★★★

We finally got real data from suppliers—and used it to flag risk, not just fill reports.

Pinewood Healthcare

Surface What's Hidden
Identify supplier-level gaps in ESG data, disclosures, and compliance

Drive Supplier Action
Share forms, assign follow-ups, and monitor completion status

Track Risk, Not Just Reports
Score sustainability risk and performance across tiers with clarity and structure

Global Standards for Reliable Sustainability Disclosure

The IFRS Sustainability Standards (S1 & S2) establish a global baseline for sustainability-related and climate disclosures, ensuring consistent, investor-focused reporting that connects financial and non-financial performance.

★★★★★

Pontika boosted reliability, streamlined operations, and enhanced efficiency using Newtral's seamless automation and integrations.

Pontika Aerotech Labs

Seamless Adoption
IN-CSR's advisory expertise combined with Newtral's platform ensures smooth integration of IFRS S1 & S2 into corporate reporting.

End-to-End Support
From consultation, training, and gap assessments (IN-CSR) to automated data capture and disclosures (Newtral).

Regional Relevance
Tailored for businesses in Nigeria and Sub-Saharan Africa where IFRS is already the backbone of financial reporting.

Nigeria’s Roadmap to Mandatory ESG Transparency

Nigeria has aligned its disclosure requirements with IFRS S1 & S2, setting clear timelines for large companies (2028) and SMEs (2030), supported by regulatory frameworks such as the Climate Change Act, NGX Guidelines, and NSBP.

Investors expect credible, comparable disclosures, —non-compliance risks higher financing costs and reputational setbacks.

Set the Pace
Early adopters are gaining investor trust, operational resilience, and a head start on compliance.

First Movers Advantage
Companies that begin alignment today benefit from enhanced reputation, easier financing, and smoother transition before 2028.

Shape the Market
Pioneers in disclosure are influencing industry standards and strengthening stakeholder confidence.

Robust Data Security and Quality Certifications

Newtral AI Platform is GDPR ready

Compliant with 27001, 9001:2015, 14001

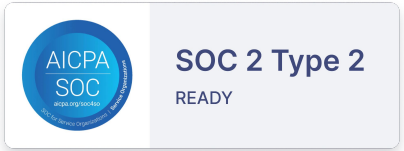

Data hosting globally present in US, Europe and India amongst other geographies

We use Global best-in-class tech infrastructure including MongoDB,, AWS (Amazon Web Services) & Google Cloud Services

---

DRATA

Partnering with Drata, Global Leader in Enterprise Data Security Compliance for SOC 2 Type 2 Compliance. Following Global best practices on Newtral AI

Letter from Drata

Secure, Scalable and Robust IT Infrastructure

Hybrid Cloud Architecture

- Hosted on GCP for flexibility and global coverage
- Primary compute workloads run on GKE (Google Kubernetes Engine) and VMs (Virtual Machines)
- AWS Services are used for supporting workloads

Enterprise-Grade Security

- Full encryption for all databases and endpoints-at rest and in transit
- Industry-standard SSL/TLS 1.2.+ across all external and Internal communication layers
- Regular internal security audits, internal penetration testing, and vulnerability management

High Availability & Scalability

- Elastic infrastructure that auto-scales to meet demand
- Built-in load balancing, CDN integration, and disaster recovery

DevOps & Infrastructure-as-Code

- Automated CI/CD pipelines via GitHub Actions and Terraform
- Immutable infrastructure-changes are deployed through versioned replaceable builds

We make it easy for you.
You make it easy for the planet.

1200+ hours saved. 97% success rate.
One platform to power Sustainability at scale.
