

LC-48T

Air Heat Pump LC-48T

For commercial use

High capacity

With a heat output of up to 18kW and a long throw length, it is capable of heating large areas efficiently.

Simple installation

With a capacity equivalent to over 3 regular-sized heat pumps and the ability to be placed almost anywhere, this provides great flexibility at a low installation cost.

Easy maintenance

The LC-48T has large air filters that are easy to access and easy to clean, which is another thing that makes it suitable for commercial contexts such as machine halls, storage and assembly rooms.

LC-48T

Adapted for the Nordic climate

Unlike many other commercial machines, these have both trays and compressor heaters and are thus well adapted to our cold Nordic climate.

An environmentally friendly alternative

The LC-48T has the environmentally friendly refrigerant R32 and with its inverter compressor it adapts the operation as needed, which provides an environmentally friendly and cost-effective operation.

Stylish design

Nicely designed interior that blends into everything from workshop to office environments.
