Wishes from the INTEC coordinator.

At the start of 2024, I would like to wish you all the very best for your goals, plans and resolutions in this new year, both in your personal as well as in your professional life. I take the opportunity to thank all the members of the coordination office and of the different organizing committees for their hard work in making the 2023 INTEC events a success. I look forward to the planned 2024 events together with you all! Some highlights on these events can be found in this newsletter and the INTEC website.

All the best,

Olivier Vanakker.

“INTEC is an inclusive community that is also dedicated to nurturing growth and advancement of young researchers”

SAVE THE DATES!

The dates and location of our 2024 Summer school and 2024 Annual Meeting have been decided. This year our Summer school in **Modena, Italy** will be organized on **July 1-3, 2024** with a focus on proteomics of calcifying tissues. Follow the INTEC website regularly for updates on the program and registration as the number of participants will be limited to 10.

The 2024 Annual Meeting will be organized by the team of Leonor Cancela in **Faro, Portugal** on **September 12-13, 2024**. Stay tuned for more information on the program and abstract submissions via itnintec.com!

The 2024 webinar series are here!

Also in 2024 we continue our webinar series together with ISSEC. Even better, we have increased the number of webinars from 6 per year in 2023 to 9 per year in 2024. The first 6 can be found below and online. A **novelty** is that PhD students and Postdocs can request a **certificate of attendance** for e.g. their Doctoral Schools Program. You can mark a checkbox to receive a certificate when registering for the webinar via intintec.com/webinar.

2024 WEBINAR SERIES

Free virtual events
4 - 5 PM CET

in collaboration with

January 9th 2024

Mark D. McKee (McGill University, Canada)

The Stenciling Principle for normal and ectopic extracellular matrix calcification: Inhibiting the inhibitors in bones, stones and blood vessels

April 9th 2024

Sergio Bertazzo (University College London, UK)
Mineralomics and Pathological Calcification

February 13th 2024

Isabel Orriss (Royal Veterinary College, UK)

Can we treat arterial medial calcification without negatively impacting the skeleton?

May 14th 2024

Marc Dweck (University of Edinburgh, UK)

Measuring developing calcification in the vascular system.

March 12th 2024

Monzur Murshed (McGill University, Canada)

The systemic and local factors affecting bone mineralization in X-linked hypophosphatemia

June 11th 2024

Annika Keller (University of Zürich, Switzerland)

Ectopic brain calcification: the protective role of microglia

Online registration is required but free of charge and can be done via <https://www.itnintec.com/elementor-webinarseries/>
