COMMUNICATION CAN SAVE LIVES

NEW · 2026

COMPACT FULL DUPLEX INTERCOM

iriBridge-2R

Talk as if you were side by side.
Even over the engine.

No shouting, no push-to-talk, no bulky headsets. Two users speak hands-free in true full duplex — while monitoring and transmitting on up to two external radios.

2× 2.4 GHZ HEADSETS

2× EXTERNAL RADIOS

500 m UNIT-TO-UNIT LINK*

01 · HOW IT WORKS

One unit. Two users. Two radios.

Pair two iriComm 4.0 or other 2.4 GHz headsets (up to 50 m from the unit) and talk freely — **no PTT between users**. Transmit on radio with headset PTT or an external PTT's.

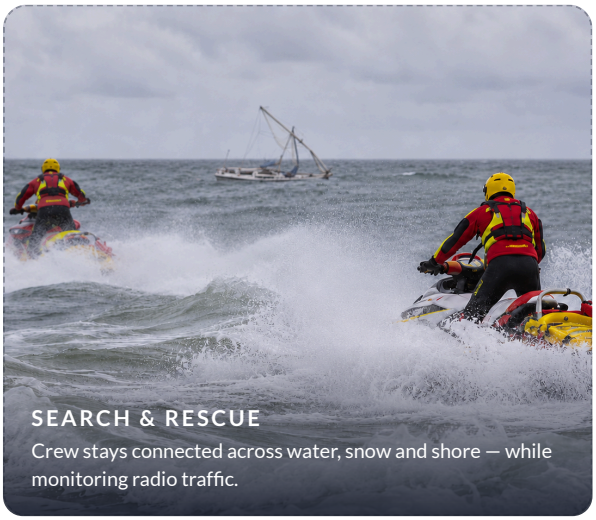

Two units. One crew — across vehicles.

Link two iriBridge-2R systems wirelessly and connect **jet skis, vehicles, machinery or remote operators** into one conversation.

02 · WHERE IT WORKS

Wherever two people need to talk — and the noise won't let them.

Smaller.
75% reduced size for installation in tight spaces.

Smarter.
Dual modular radio interfaces with field-replaceable cables.

Stronger.
New 2.4 GHz wireless platform — better range, ultra-fast reconnect.

* Range depends on antenna type and installation.
