

**JBM Recycling is South
Yorkshire's Leading
Metal Recycling Service**

JBM Recycling is the UK's leading metal waste management facility based in South Yorkshire, we process and recycle all ferrous and non-ferrous metal waste.

We help businesses sustainably recycle their metal waste while offering maximum value. Whether you are a large organisation or a tradesman, our combination of services and solutions are ready to meet your waste management needs.

To ensure accuracy, our modern 10,000m² recycling facility houses state of the art weighing machinery and Niton XRF instruments. Our attention to detail and modern equipment allows us to quickly and accurately process your metal waste.

Our metal recycling facility is based in Swinton, which is easily accessible from Rotherham, Doncaster, Barnsley and Sheffield. We offer collection, drop off or commercial skip hire services and operate across the whole of the United Kingdom.

We are fully accredited with a waste carriers license and are waste exemption registered.

We help businesses across the United Kingdom sustainably recycle their ferrous and non-ferrous metal waste.

Our free skip hire service offers a practical, efficient and simple way of removing metal waste from your site. Once collected and delivered to our metal recycling facility, we sort, weigh and process all non-ferrous materials.

To offer competitive rates, we have partnered with the UK's leading foundries and our prices are updated daily. For more information on the services we provide or to understand how we can support your business please telephone: 01709 940 094

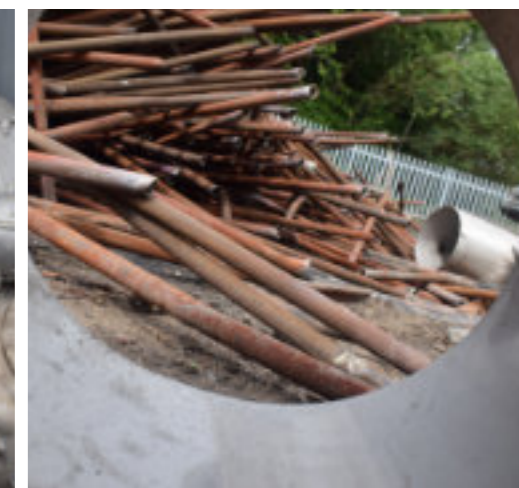

Our Services

We deliver a skip at no cost to your premises, once filled with non-ferrous metals we will arrange a collection. The skip is weighed at our facility where your payment is calculated.

We accept deliveries or can arrange a collection for all ferrous and non-ferrous material, all materials are sustainably recycled at our recycling facility based in Swinton, South Yorkshire.
