Introduction

Purpose for Creating the Zodiac Stones™

Astrology is a wonderful tool for self-understanding. In my long tenure consulting with clients as a professional astrologer, I've searched for tools to enhance my skills and improve the lives of those around me. That is why I tirelessly worked to create the Zodiac Stones™.

They can enhance your natal astrology potential and assist in smoothing over difficulties in your chart. They can even help you work with the current transits so you can make the best use of the planetary cycles as they impact your life (*see "For the Astrology Enthusiast, pg 18*).

Here is the best part: no previous astrological understanding is necessary! Whether you are a professional, novice or somewhere in between, I have authored this book as an easy reference manual. Open anywhere and begin! You can also flip back to the appendix, search for something you would like to improve or develop. You may choose to carry a Jupiter stone for a little extra optimism or a Mars stone for increased physical energy. Whether it is wealth, love, decisiveness or peace, there is a Zodiac Stone™ to support you.

There are endless possibilities. With this book I hope to give you a start in exploring how the Zodiac Stones™ will best work for *you*.

Connection Between Stone & Symbol

Symbols are powerful. Just like the written word, a symbol has a meaning and carries a vibration. The Zodiac Stones™ use astrological symbols and their inherent meanings to enhance particular properties of the respective crystals or stones. If you can identify what area of life you would like to improve, you can use this book to find the right Zodiac Stones™ for you.

The purpose of this book is not to perfectly match one crystal or stone to only one particular symbol. This approach is quite limiting and not always useful. There are stones with properties that vibrate similarly to multiple symbols and vice versa.

While we can attach symbols to stones, they are not magical. They are just tools to help us navigate this world. Just like a pencil is a tool, so is astrology, crystals and stones. They are mechanisms that support and empower us along our journey. And in this world, we need all the help we can get!

The Zodiac Stones

Symbol: Venus
Stone: Rose Quartz

Element: Air, Earth
Color: Pink

Energy

Venus in natal astrology represents what we like and how we relate to others. It rules over the zodiac signs Taurus and Libra, whose elements are earth and air. The symbol Venus engraved on Rose Quartz helps one with the healing of hurt and loss in love/friendship, as well as attracting new relationships. This stone also stimulates the imagination. It's a wonderful companion when producing works of art or other creative endeavors. Note: if using this stone to attract love and/or friendship, the protective energy of obsidian can interfere with this process. *See Obsidian for more information.*
