

## SUPER Silent Air Boy®

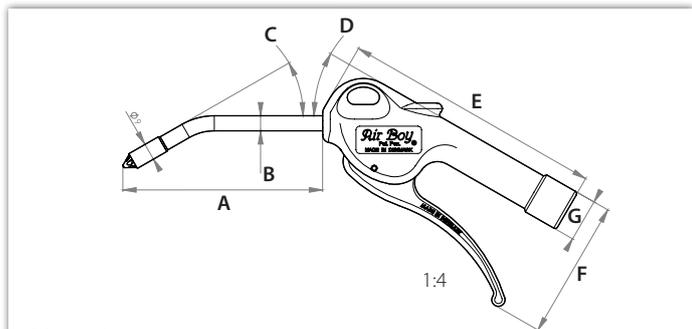

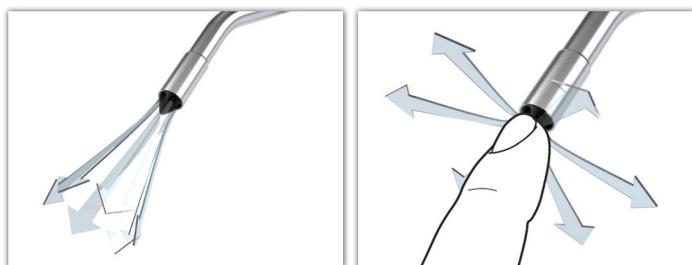

Low noise level, unblockable and high blowing force!

Blowgun with stainless bent pipe, ø8mm

The SUPER Silent Air Boy® combines all the best features. It is silent with only 78,5 dB at 8 bar and complies with OSHAs and EU's requirements in regards to noise level. The blowing force is high with 330 l/min. / 2,94 N at 8 bar compared to most of the low noise level blowguns on the market. The construction of the nozzle secures that the nozzle is unblockable and therefore complies with OSHA STD 1-13.1 requirements. The bent pipe is produced in stainless steel.

The JWL ergonomic design is a classic in itself. We use the compressed air to ease the activating of the handle making it easy, accurate and simple to operate.

The SUPER Silent Air Boy® is produced in an impact-resistant acetal plastic (POM).
