

JWL Body gun

Simple and effective corrosion protection.

JWL Body gun is used for the treatment and maintenance of cars and other vehicles that are subject to corrosion and stone-chipping.

JWL Underseal guns are suitable for both water-based and oil-based fluids. For water-based fluids, we recommend using body guns with plastic suction pipe.

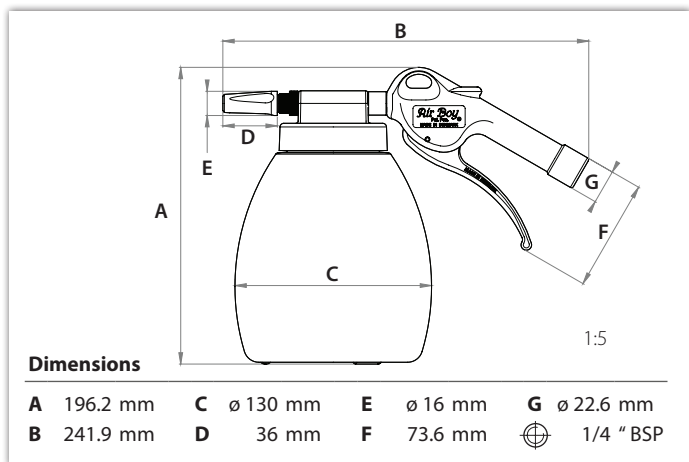

JWL Underseal guns are developed in cooperation with leading manufacturers of anti-corrosion fluids.

JWL Underseal guns are designed to be user-friendly and operated quite easily. The fluid flow is infinitely adjustable and easily regulated with the trigger.

All nozzles are easily replaced with cavity tubes or pipes.
