# SIMPLY SWAP

CONTENTS

Criteria to consider when swapping the “old” refrigerator.

Absorption fridges	4 – 6
Compressor fridges	7 – 9

NEW FOR OLD – SIMPLY SWAP

Would you like to replace your good old absorption refrigerator with a contemporary one of the Dometic 10 series or a NRX90V to enjoy more convenience, up-to-date technology and a real eye-catcher in your kitchen?

Our swap guide helps you to find out which absorption or compressor refrigerator model best suits your size requirements.

VENTILATION CLEARANCE

Please note that the unit dimensions given in the tables on the next pages refer to the size of the refrigerator only. The size and position of the ventilation openings may differ from those of your current fridge. For Dometic refrigerators, a clearance of 15 mm to 25 mm must be maintained to the vehicle wall in addition to the depth dimension of the unit.

HEIGHT COMPENSATION

If your new Dometic refrigerator is a bit smaller in height than its predecessor, you can easily compensate for the height difference by attaching feet to the unit. For Thetford models, a minimum distance of 12 mm to the floor must be maintained if no feet are attached to the appliance.

**Besides these general notes, it is always advisable to read the installation instructions of the desired appliance before replacing a refrigerator.**

**COMPRESSOR  
POWER**

**COOLING AND DEEP-FREEZING UP TO -12 °C**

Compressor refrigerators offer outstanding energy efficiency and cooling performance even when ambient temperatures head for the extremes. They provide reliable cooling and deep-freezing down to –12 °C, even when operating on an angle. Suitable power sources: 12 V DC grid or solar panel.
