Data Protection Overview

The right to privacy is a fundamental right under human rights. There have been data protection laws in place for some time, one of the earliest ones was 1984. The most recent change was the introduction of the EU General Data Protection Regulation (GDPR) and the UK Data Protection Act 2018. Since the UK is no longer a member of the EU there is now a UK GDPR to continue with the high standards of protecting individuals' rights under privacy laws. This guidance provides an overview of data protection laws and what is required to comply with the law.

Data Protection Principles

There are six key data protection principles which must be followed, with an overarching principle of Accountability which requires an organisation (controller) to demonstrate their compliance with data protection laws. Personal data shall be processed as follows:

1. Processed lawfully, fairly and in a transparent manner in relation to the data subject ('**lawfulness, fairness and transparency**')
2. Collected for specified, explicit and legitimate purposes and not further processed in a manner that is incompatible with those purposes ('**purpose limitation**')
3. Adequate, relevant and limited to what is necessary in relation to the purposes for which they are processed ('**data minimisation**')
4. Accurate and, where necessary, kept up to date; every reasonable step must be taken to ensure that personal data that are inaccurate, having regard to the purposes for which they are processed, are erased or rectified without delay ('**accuracy**')
5. kept in a form which permits identification of data subjects for no longer than is necessary for the purposes for which the personal data are processed ('**storage limitation**')
6. processed in a manner that ensures appropriate security of the personal data, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures ('**integrity and confidentiality**').

As referenced earlier there is the Accountability principle which states "The controller shall be responsible for, and be able to **demonstrate compliance** with the principles ('**accountability**')."

Data Subject Rights

Individuals (known as data subjects under data protection laws) have a number of rights under data protection laws. These are as follows:

1. The **right to be informed** – a privacy notice in relation to the purpose of processing will address this. This links with Principle 1 fairness and transparency. An individual should be provided with a privacy notice when their data is collected.
2. The **right of access**, commonly known as subject access request (SAR) – this means an individual has the right to access and receive copies of personal data an organisation holds.
3. The **right to rectification** – this means any personal data which is held by an organisation that is incorrect or incomplete data the individual has the right to correct the data or in the case of incomplete data, provide further detail.
4. The **right to erasure**, commonly known as the right to be forgotten (RTBF) – this means an individual can request all data held about them be deleted by the organisation.

The Church of Scotland

5. The **right to restrict** – this links with some of the other rights and means an individual can request that the organisation restricts processing their personal data while the issue is resolved, for example if the data is incorrect and the rectification right is exercised.
6. The **right to data portability** – this means an individual has the right to request an organisation provide their personal data in a machine-readable format, e.g. a .csv file and transfer it to another organisation
7. The **right to object** – this means an individual can object to the processing and the controller has to stop unless the organisation can prove a legitimate lawful purpose for the processing. The right to object is absolute in relation to marketing purposes.
8. **Automated individual decision-making, including profiling** – Currently the Church does not carry out automated individual decision-making including profiling. However, if the Church did, this right means that the individual has the right to request that there is human intervention in the processing rather than entirely automated. So, if the Church does begin doing this type of processing, individuals must be informed and the Church must build into the system a way that the decision making can be made by an individual.

Not all rights are absolute and depend on the lawful basis for processing. The table below provides detail as to what rights apply depending on the lawful basis for processing.

Data Subject Right	Lawful Basis for Processing					
	Consent	Contract	Legal Obligation	Vital Interests	Public Interests/task	Legitimate Interests
Informed	Yes	Yes	Yes	Yes	Yes	Yes
Access	Yes	Yes	Yes	Yes	Yes	Yes
Rectification	Yes	Yes	Yes	Yes	Yes	Yes
Erasure	Yes	Yes	No	Yes	No	Yes
Restrict Processing	Yes	Yes	Yes	Yes	Yes	Yes
Portability	Yes	Yes	No	No	No	No
Object	No	No	No	No	Yes	Yes
Automated Decisions	Yes	Yes	Yes	Yes	Yes	Yes
Withdraw Consent	Yes	No	No	No	No	No

Key Data Breach Reporting Requirements

The Church has a number of obligations under data protection laws, as detailed above and in further detail at the Resources section of the Church website. One aspect that is essential is the proactive reporting of a data breach. If the Church is made aware of a **'personal data breach'** (defined as a

The Church of Scotland

breach of security leading to the accidental or unlawful destruction, loss, alteration, unauthorised disclosure of, or access to, personal data transmitted, stored or otherwise processed) it has 72 hours to report it to the regulator, UK Information Commissioner's Office (ICO). If the breach is likely to impact on the rights and freedoms of the affected individuals they must be informed too. The reporting of incidents swiftly is vital, especially considering that the ICO could fine the Church **£17.5 million or 4% of annual global turnover** – whichever is greater – for data breaches. So as well as reputational damage to the Church there could be monetary damage caused by a data breach. It is therefore vital that such breaches are identified and reported without undue delay and ideally no later than 24 hours.
