KMM CONSULTING

KMM Consulting Supports Nuove Energie in its Acquisition by Trentar

KMM Consulting is pleased to announce its contribution to the successful acquisition of Nuove Energie by Trentar, supporting Nuove Energie and its shareholders throughout the transaction process.

Nuove Energie is an established Italian and U.S.-based water technology company with more than 45 years of experience in advanced filtration solutions for municipal and industrial water and wastewater treatment. The company has built a substantial global installed base and is particularly known for its patented Dynamic Tangential Filtration® (DTF) technology, which is used across its Ultrascreen®, Primescreen® and Conoscreen® product platforms.

Following the transaction, Nuove Energie becomes part of Trentar's expanding water activities under Nuove H2O, the group's newly launched global water solutions brand. The combination is intended to provide a platform for further international growth across water treatment, reuse, resource recovery and sustainable infrastructure.

KMMC's Role in the Transaction

KMM Consulting worked on the seller's side, supporting Nuove Energie and its shareholders from the initial identification of potential buyers through to completion of the transaction.

KMMC's involvement included identifying and approaching suitable strategic buyers, facilitating both online and in-person meetings with selected interested parties, and supporting the preparation and review of technical and commercial information required throughout the transaction process.

As discussions progressed, KMMC continued to act as an interface between the parties, supporting the commercial and technical dialogue and helping to facilitate negotiations through the Share Purchase Agreement (SPA) process and final closing.

The transaction reflects KMMC's approach to M&A advisory in the water sector: combining deep industry knowledge with an understanding of technologies, markets and strategic fit to identify suitable counterparties and facilitate transactions from initial market engagement through completion.

For Nuove Energie, joining Trentar represents an opportunity to accelerate the international development of its established filtration technologies and expand their reach across municipal and industrial markets. At the same time, the acquisition strengthens Trentar's capabilities in advanced water treatment and provides another important building block for its developing global water platform.

KMM Consulting congratulates the shareholders, management teams and employees of Nuove Energie and Trentar on the successful completion of the transaction and looks forward to following the next chapter of their growth journey.

About Nuove Energie

Nuove Energie is an Italy, U.S. and United Kingdom based water technology company specializing in advanced filtration systems for municipal and industrial water treatment applications, utilizing its patented Dynamic Tangential Filtration® unique technology (DTF).

About Trentar

Trentar is a group of visionary companies building advanced systems across key sectors spanning commercial mobility, energy & battery storage, geospatial intelligence, data science & artificial intelligence and health management. Through Nuove H2O, its global water technologies brand, Trentar is expanding its capabilities across water treatment, reuse, resource recovery, and sustainable infrastructure.

About KMM Consulting

KMM Consulting is a specialized advisory firm focused exclusively on the global water and wastewater industry. We support water technology companies, entrepreneurs and investors with sell-side and buy-side M&A advisory, capital raising, strategy, market development, commercial and technical due diligence, and business development.

Our combination of transaction expertise, technical understanding and an extensive international water-industry network enables us to support clients throughout the full lifecycle of strategic growth and investment initiatives.
