

We're still standing

**Here's a song about fossil fuel
you ought to know by now that it isn't cool
drilling oil from the ground is so last year
so if you want a place to live in the future
you better shift your gear**

**You can never cool this burning heart
Even in a storm, we won't fall apart
we will stay here till you change your game
If you close your eyes to what will kill us
- you're the ones to blame**

**Don't you know we're still standing
better than we ever did.
fighting like the true survivors, taking no more of this
shit
We're still standing after all these years
picking up the pieces of the planet with our eyes in tears**

we're still standing, yeah, yeah, yeah

we're still standing, yeah, yeah, yeah

**Big oil rivers flowing through our veins
it's time to stop the stream,
let our children gain
a place to live where there's a sky so blue,
and if you think that you can ever fool us,
you haven't met our crew**

**Don't you know we're still standing
better than we ever did**

**fighting like the true survivors,
taking no more of this shit
We're still standing after all these years
picking up the pieces of the planet with our eyes in tears**

We're still standing, yeah, yeah, yeah

We're still standing, yeah, yeah, yeah

½ vers du du du du

**Don't you know we're still standing
better than we ever did
fighting like the true survivors,
taking no more of this shit
We're still standing after all these years
picking up the pieces of the planet with our eyes in tears**

We're still standing, yeah, yeah, yeah

We're still standing, yeah, yeah, yeah

Vamp

**We ask you to stop
Enough is enough
We're fighting for the future
We will never give up
We ask you to stop
Yeah yeah yeah**
