

FREEDOM

Every day I hear a different story
ecosystems losing all their glory
feels like fossil fuels are stealing precious life on our planet Earth, oh

If you love us, baby, you'd just stop it
But you laugh and tell us we're too stupid
Tell us we're romantic and we don't understand

But you know we can't forgive you
Not this once, twice, or ever
'Cause baby, you have dragged us to hell and back
You will have to reconsider
and you should

we just want our freedom
we don't want to play around
we don't want pollution, baby
fossil fuels just bring us down
we just want our freedom
shut down your dirty business now!

Noooooow!
Whoa, oh, yeah
Do-do-do-do-do-do
Whoa, oh, yeah

Like a prisoner who has his own key
We will go and let our nature run free
shutting down old oil and opening up for both sun and wind
You take our hands and tell us we are fools to do all that we do,
I bet you someday, baby, you'll realize it's true

But you know we can't forgive you
Not this once, twice, or ever
'Cause baby, you have dragged us to hell and back
You will have to reconsider?
and you should

we just want our freedom
we don't want to play around

we don't want pollution, baby
fossil fuels just bring us down
we just want our freedom
shut down your dirty business

Noooooow
Whoa, oh, yeah
Do, do, do
Whoa, oh, yeah
