SENIOR IT PROGRAM / PROJEKT-/ TRANSITION LEADER, TEST LEADER, SCRUM MASTER, MANAGEMENT CONSULTANT - CURRIULUM VITAE

Name:	Henrik	
	Rønnest	90
Born:	27.01.1969	

Key qualifications

Henrik is an experienced certified (IPMA C, PRINCE2 Agile Practioner, ISTQB Test Manager, Scrum Master, ITIL V3, Safe Agile 5.0) senior project, program, transition, and test manager who takes great pride in completing the tasks with control (incl. the distressed projects) with care, quality and profit, so that the project is completed within the agreed time, price and quality.

Henrik has worked as a freelancer/interim manager since 2005 at A.P. Moller Maersk, IBM, Fujitsu, Falck and JN DATA (JN DATA over 7 years of 3 contract periods), KMD Outsourcing of Energinet to Kyndryl/IBM and latest Senior project manager at FlexDanmark replacing new IT system for Flex Traffic in Denmark and he has been in the IT industry since 1992.

Leads the way with high energy (we must and can attitude), persistence and will and shows the way together with the team, customers, and suppliers so that we effectively achieve the goals and changes agreed with the project owner/project sponsor. Is with the naturally authoritarian and trustworthy behavior the focal point.

Industry knowledge is Banking, Telco, Supply/Settlement, Shipping/Logistics, Planning/Dispatch, Standardization and Outsourcing.

Specialist in the establishment of nearshore/outsourcing (Poland, India), PMO (project governance) and has completed a myriad of infrastructure projects (ink. international) where the largest are 6 data center relocations for JN DATA (customers BEC, SDC, BD) into 2 data centers, establishment of Windows server migration factory in DK/PL as well as standardization/optimization and relocation of Falck IT operations. GDPR experience. Outsourcing of Energinet IT and employees from Energinet to KMD via

Kyndryl/IBM as a subcontractor and most recently as senior project manager replacement of IT system for FlexDanmark and its customers.

Further projects for JN DATA 1) security project establishment of security patch factory (vulnerability management) in the Poland/Denmark network area. The project includes approx. 65 network technicians, patch managers, processes, tools, customers, reduction of CVE back-log agreements, etc. 2) Establishment of network documentation incl. New WIKI portal, migration/cleanup of old documentation, lifecycle management, security modules/classification modules and implementation of NETBRAIN (layer 1-2-3 topology drawings).

Is well-liked and respected which is built through trust and results (check references)

Resident in North Jutland (Denmark), but moves geographically throughout Denmark as needed and remote work globally.

Configuration management solution for APMM

Outstanding commitment – impeccable timing

At the end of last year, within a very short timeframe, GCMS* (Global Configuration Management Service) was successfully implemented for A.P. Moeller-Maersk. This story confirms that IT Delivery is leading the way in configuration management.

The A.P. Moeller-Maersk (APMM) Group is a Denmark-based global company engaged in marine transportation, oil production and shipbuilding. It comprises approximately 1,100 companies with a presence in 130 countries.

In September 2008, APMM requested a smart configuration solution enabling improved change management and reporting. They needed it implemented and working glitch-free – in three months! So IT Delivery had until December to deliver this complex GCMS solution. And failure meant penalties.

According to Peter Vernegreen, Nordic SMI Service Line Lead: "This was one of the first large-scale implementations of its kind in Europe. Yet, through a combination of teamwork, good communication and sheer determination, we successfully implemented the solution within what is one of the tightest deadlines I've ever know for a project of this complexity – and I've been working for IBM for over thirty years."

The brief from the client also changed drastically during the project's lifespan. But the IT Delivery team re-prioritised whenever necessary and interlocked with Service Management to drive the solution forward. Altogether the project consumed 1000 hours.

"It's all about teamwork, communication and having a strong project manager – Henrik Ronnest – who kept people in the loop and always ensured on-time delivery throughout the project," adds Peter.

"Plus, we had the right people from the right competencies: Service Management, Wintel, UNIX, System Management and the networking guys. The commitment from the managers of those competencies was outstanding and we were always allocated the appropriate expertise."

"The real bonus is everything ran seamlessly. There were no issues that needed ironing out following implementation."

*NB GCMS (Global Configuration Management Service) is no longer available for European implementations. This offering has been replaced by the Tivoli Refresh Program which includes ITADDM (IBM Tivoli Application Dependency Discovery Manager) configuration discovery services.

Thanks.

As agreed, here's a take-out – hope you can use it.

Henrik Rønnest has been associated with JN Data, as test manager and part-project manager on the BEC and SDC Moving Project. He has been from December 2010 to May 2013. Here he has been the overall test manager for the overall project as well as on the individual relocation packages. In addition, he has been a part-project manager on many relocation packages, which all in all, has ensured that JN Data has taken over operations from BEC and SDC.

Henrik has fulfilled his role in the project very satisfactorily. His deliveries are delivered at the agreed time and quality. Henrik is very efficient, industrious and responsible, which we have been very happy about, and which has been incredibly important in this political project. As JN Data has been very pleased with Henrik's efforts, JN Data has also offered Henrik to continue his involvement in JN Data with the Bankdata move in 2013 and 2014.

Written by Franz Gaardsted Reimann. Overall project manager for the BEC and SDC Moving Project in JN Data.

Regards

Franz G. Reimann
