Blomsten

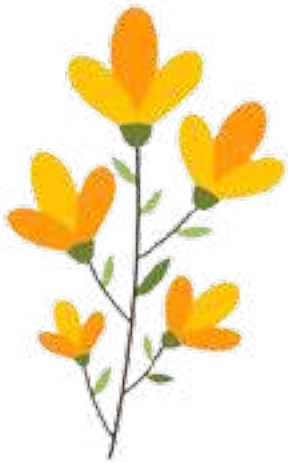
Blomster kan ha mange former og farger.

Selv om de kan se forskjellige ut, er de fleste faktisk bygget opp på samme måte.

De har et **skudd** med forskjellige blader, som sitter rundt om, som en krans.



Hvis en plante skal kunne **lage frø**, så må den **bestøves.**

En plante blir bestøvet når **blomsterstøv** flyttes fra en plante til en annen.

Insektene hjelper blomstene med å bestøve, når de flyver fra en blomst til en annen.

Vinden hjelper også blomstene, når den blåser blomsterstøv fra en blomst til en annen.

Blomsten

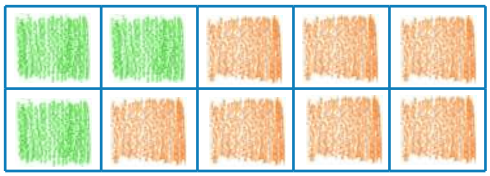
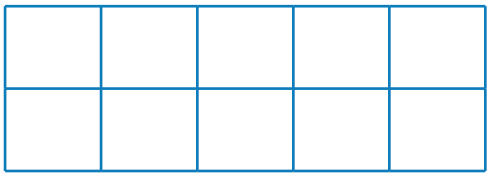
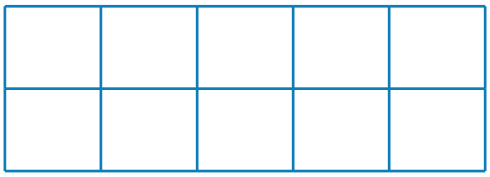
Skriv inn tall i boksene som til sammen gir 10.
Bruk de blå rutene som hjelp.



3 + 7 = 10

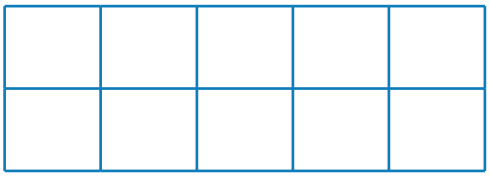


__ + __ = 10

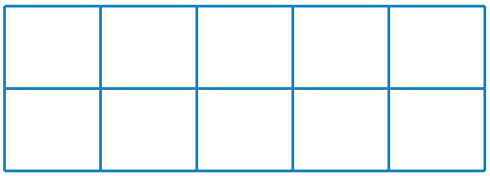


__ + __ = 10

__ + __ = 10



__ + __ = 10



__ + __ = 10

Blomsten

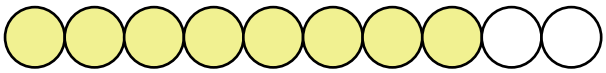
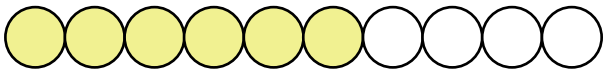
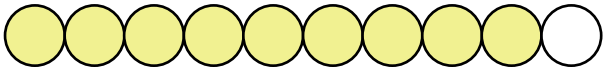
Finn 10'er venner. Skriv tall i ruten slik at svaret blir 10.



8 + ☐ = 10

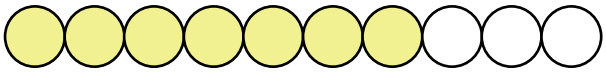


6 + ☐ = 10

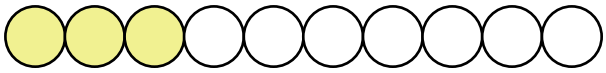


9 + ☐ = 10

2 + ☐ = 10



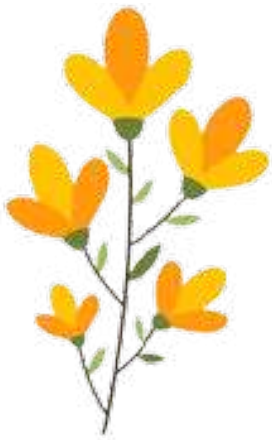
7 + ☐ = 10

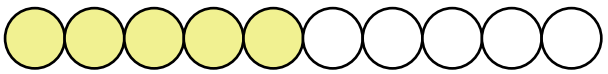


3 + ☐ = 10

1 + ☐ = 10

4+ ☐ = 10





5 + ☐ = 10
