

# MENTORSHIP EVALUATION

Since you are now approaching the end of your mentorship, we suggest that you do a final evaluation in order to reflect on your shared process. The idea is that each of you each fill out a copy of the evaluation. Afterwards you can share your perspectives.

What have we accomplished together?

Which goals have we achieved - short and long term?

What has been the three biggest eye-openers while working together?

What has made this partnership work?

What difficulties, if any, have you experienced while working together?

If the mentee is still seeking a job, what is a good plan of action from here?

Who could the mentee contact for further input when the mentorship ends?
