LIPS BRAND CREATION & PHILOSOPHY

NAME MEANING

In Greek mythology, the winds were revered as forces of nature. Various genealogies and names were used for the winds, with Lips being mentioned as the south-west wind. Lips is therefore symbolic of the south-west wind, which is traditionally associated with the approach of rain, on the one hand, and the lips that touch the glass when drinking, on the other. This connection between the wind and the lips is also reflected in the art of glassblowing, where the glassblower's breath shapes the glass. The brand stands for a harmonious combination of tradition, craftsmanship and innovation.

HISTORY AND TRADITION

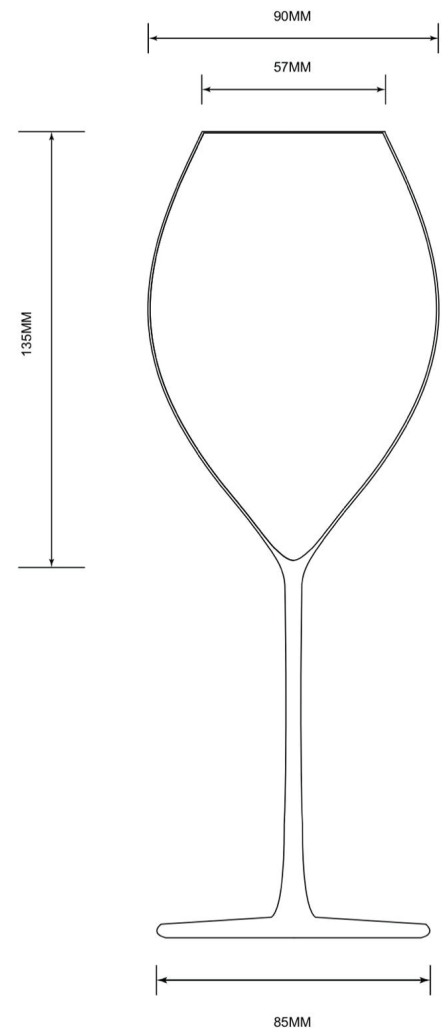

The inspiration for the style and design of LIPS glasses goes back to the beginnings of glassmaking in Austria and Bohemia. In this rich tradition of mouth-blown glass, unique masterpieces of the highest quality and elegance are created. The art of hot-blowing, passed down through generations, characterizes every LIPS creation and lends it a timeless beauty.

THE ART OF GLASSBLOWING

The art of glassblowing, an ancient technique dating back thousands of years, is mastered at LIPS at the highest level. Each glass is crafted with attention to detail and artisanal skill to achieve the perfect balance between aesthetics and functionality. From shaping to finishing with the foot, each piece is created by experienced craftsmen.

A COMBINATION OF TRADITION AND INNOVATION

LIPS combines the timeless beauty of handmade glass with modern standards of quality and design. Each glass tells its own story and invites you to share and enjoy precious moments. With LIPS, every sip becomes an unforgettable experience - a tribute to the art of wine enjoyment and the beauty of life.

LIPS#1 [CHAMPAGNE]

ART# LCOI

The shape of the champagne glass gives the grape varieties room to develop without the carbon dioxide being lost too quickly. The special conical taper directs the aromas straight to the nose, while the larger goblet allows for impressive bubbles to form. This allows a wide range of aromas to unfold without losing freshness.

FEATURES:

- Mouth-blown for the highest quality
- elegant appearance
- Light and thin-walled, yet elastic
- Meets the requirements of upscale gastronomy and the modern household
- Dishwasher safe*

Volume: 500ml
Height: 250mm

lips

LIPS#2 [WHITE]

ART# LWOI

The white wine glass presents a thinner stem that allows less air contact to preserve the acidity and keep the white wine cool. The side angles of the goblet direct the aromas straight to the nose to experience the full pleasure of the wine's evolution.

FEATURES:

- Mouth-blown for the highest quality
- elegant appearance
- Light and thin-walled, yet elastic
- Meets the requirements of upscale gastronomy and the modern household
- Dishwasher safe*

Volume: 560ml
Height: 245mm

LIPS#3 [RED]

ART# LROI

Red wines unfold their finesse and elegance in this glass shape. The generous oxidation surface allows the wine to develop optimally, whereby slight excess alcohols and acids can evaporate ideally.

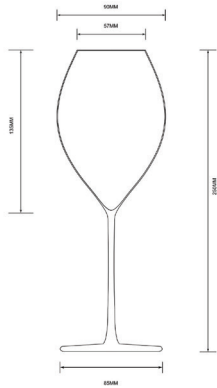

FEATURES:

- Mouth-blown for the highest quality
- elegant appearance
- Light and thin-walled, yet elastic
- Meets the requirements of upscale gastronomy and the modern household
- Dishwasher safe*

Volume: 740ml
Height: 240mm

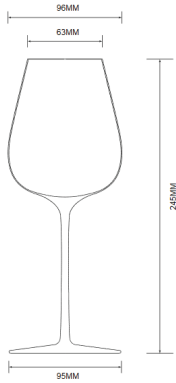

PRODUCT DETAILS

Product #LC01
