

Avatar-based AI Revolutionizes Remote and Hybrid Education

Teach more effectively online while adding a human element to asynchronous learning.

Enter Enskill® Ed from Alelo

Enskill Ed is an avatar-based AI solution that enables your institution or school to effectively conduct remote and hybrid lessons at lower costs – and with superior results.

Effective Asynchronous Learning – at Lower Costs

With Enskill Ed, students engage in interactive online conversations with socially intelligent virtual humans. They can engage with avatars to practice a language, learn culture or history, apply civics lessons to the real-world, move from theoretical math and science to real-life application, learn vital 21st century skills, and so much more! Student responses to the avatar direct the simulations path, creating a unique experience for each student. Students can practice on their own as often as they like on a mobile device, desktop, or virtual reality headset. They receive immediate, personal feedback for improvement. As a result, students come to class better prepared, more confident, and more motivated.

AI-gathered data can be used to continuously improve avatar-based lesson plans. With powerful and engaging asynchronous learning, teachers and professors are freed up for synchronous instruction.

Enskill Ed delivers online learning that is:

- ✔ More Effective
- ✔ Measurable
- ✔ A Fraction of the Cost*
- ✔ Personalized and Engaging
- ✔ Easily Scalable
- ✔ Cloud-Based
- ✔ AI-Driven

*Compared to in-person classroom instruction.

*Artificial intelligence
role-playing for student
learning and engagement*

Meet the future: Alelo Enskill® Ed

CUSTOMIZED AVATAR-BASED AI EDUCATION THAT IMPROVES ONLINE LEARNING WHILE LOWERING COSTS

Teach Any Subject Online

Teach students online more effectively at a fraction of the cost

Role-playing with avatars is an effective teaching method for a wide variety of subjects and has been shown to keep students motivated. Automated assessments accurately measure each student's performance. Teachers and administrators can monitor student progress on a dashboard and identify those at risk of falling behind.

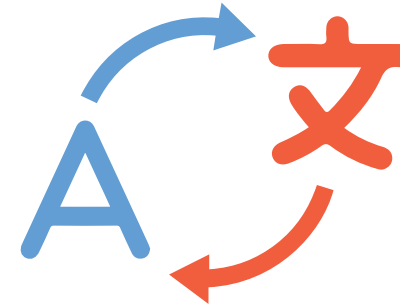

English Language Education

Improve student English language proficiency

Ensure your students' verbal English skills are ready for the global workforce. Simulations with avatars assess and train English skills required for employability under CEFR, ILR and ACTFL international standards. Enskill® English has been used in 21 countries and can also be used to teach ESL and ELA students in the U.S.

Free trial available!

Foreign Language Education

Improve student foreign language proficiency

Students become proficient at a foreign language as they role-play with AI avatars, then get personalized feedback on their performance. Avatars reflect the culture, behavior, and gestures of the language, providing deeper language immersion for students. Alelo's language team has experience with over 100 cultures.

Employability Skills Training

Prepare your students for today's workplace

Develop and assess the necessary soft communication skills and job-related competencies your students need to be successful in today's workplace. Students converse with avatars to learn the communication skills necessary for effective sales, customer service, collaboration and team leadership.

Whatever your educational needs, Alelo can create a solution

For over a decade, Alelo has been the leader in avatar-based learning for schools, academia, government, and enterprises. Alelo's avatar-based learning has been used in 25 countries and 100 cultures. Alelo's team combines experience in state-of-the-art AI technology with deep research into effective communications and a thorough understanding of the demands of online learning. Let us tailor a solution to your educational needs.
