

Målbar is looking for a Verification Engineer with production experience

Can you see through a product and do you know how it is produced, which materials it consists of and what production methods have been used? Then you might be our new colleague.

We are looking for a thorough and efficient engineer to verify production data about the products that our customers screen in our climate screening tool.

We seek a colleague who:

- Is educated within production engineering or product development engineering
- Has experience from or good insight into production of products, industrial processes as well as knowledge about materials as for example steel, aluminium, plastic, wood and glass
- Has direct experience from the furniture business (not a requirement)
- Is able to estimate and deem accurately how much material and how many resources are included in a production and thus is able to evaluate the accuracy of data
- Has knowledge about and/or experience with life cycle analysis and calculation of environmental impact
- Is passionate about reducing climate change and wishes to contribute to accelerating the green transition.

About the job

Målbar has developed a tool, where our customers can calculate the climate impact of their products. Our customers increasingly wish to document the results of their screenings and thereby have their input of materials verified. It is this process that you will have full responsibility for and this process that needs to be developed a scalable model and solutions for. Solutions that automates it as much as possible.

We want to be efficient in verifying our customers' screenings so as our new verification engineer, you need to thrive in a busy work environment without compromising with your thoroughness and professional pride. You should be able to create realistic deadlines for our customers and keep them.

We offer a full time and permanent position in a young start-up company with room for your ideas, freedom with responsibility and to be a member of a rapidly growing international team.

We will of course provide the necessary training and always be available for competent feedback.

We have recently been awarded the prize of Game Changer of the year by Danish Design Award so as a member of our team you will get the opportunity to contribute to transforming our business.

MÅLBAR

Starting date: as soon as possible.

Let's hear from you

You may contact our Co-founder and Head of Analytics and Data, Anders Koefoed at anders@maalbar.dk if you have any questions for the position or the company. You can also read more on our website www.maalbar.dk
