

Guide to downloading LCA screening data as CSV

When you open a specific screening and export the CSV from there, you receive a fully detailed breakdown of everything included in that screening.

Step-by-step guide to downloading screening data as detailed CSV within a single screening

1. Click 'Screenings'

The screenshot shows a web interface for managing screenings. At the top, there is a header with the title 'Screenings' and two buttons: 'Bulk edit' and 'Create screening'. Below the header is a search bar with the placeholder text 'Search by Name, Identification or Tag...' and a 'Filters' dropdown menu. To the right of the search bar is a sorting dropdown menu set to 'Created at'. The main content is a table with the following columns: 'Product name', 'Category', 'Supplier location', 'kg CO₂eq', and 'Created at'. Each row represents a different product screening, with checkboxes in the 'Product name' column. The table lists several products, including 'Our Chair 3.0', 'Seat - Our chair 3.0', 'Our Chair 3.0', 'Seat - Our Chair 3.0', 'Our Chair 2.0', 'Seat - Our Chair 1.0', and 'Legs - Our Chair 1.0'. Each row also includes SKU and EAN numbers, the category (Dining/meeting), the supplier location (Better Production or Solar Production), the carbon footprint in kg CO₂eq, and the creation date (27/03/2025).
