Cristofoli INTERNATIONAL

Light Weight Natural Stone **Cladding**

Design - Supply - Manufacture - Install

performance beauty simplicity

Introduction

Your idea. Our solution.

We at Cristofoli subscribe to the notion that no matter how simple, complex or downright different your idea is. We are here to help.

Our cladding service is built for you: Design. Product. Service.

Our complete service from concept design through to installation puts **Cristofoli international** at the forefront of cladding services.

We aim to simplify the complete service. For you

Eramosa marble pilasters featuring light weight cladding

Features and Benefits

- Large panel format with bookmatching option
- Honeycomb backed stone produces substantial weight savings compared to traditional stone
- In-house design and manufacturing to create your unique design to your build criteria
- Rapid installation and offsite manufacturing reduces on-site time from weeks to days
- Endless natural stone options with an international sourcing team to find your desired stone and finish
- Safe contractor approved fitters to all UK sites
- Introduction of cavity insulation creates excellent sustainability credentials. Ideal for BREEAM builds

Next Retail - High Wycombe

Cornwall House - Slough

Material

Eramosa marble bookmatched panels. 1.8m x 1,2m

A lighter feeling.

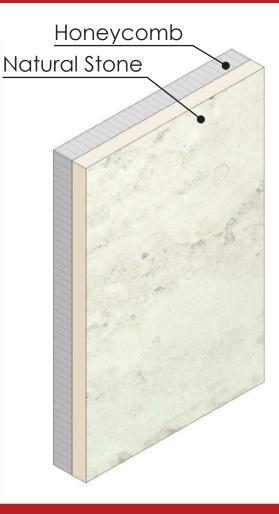

Through using honeycomb backed stone, weight and strength demands are no longer design limitations.

Large format panels become possible creating stunning visuals with no fear of cracking or failure.

It also means light weight panels, impacts less onto structural demands for your build, whilst still maintaining a "monolythic" look.

Material Features

- Low aesthetic maintenance due to surface treatment
- Typically UV resistant with no fear of discolouration over time (subject to stone selection)
- Water resistant material with applied surface treatment for added security
- Typically effective at resisting freeze thaw (subject to stone selection)
- Natural finish that cannot be replicated through synthetic manufacture
- Stable material that is mechanically strong, resisting impact and scratch damage effectively
 - Endless choices of material finish: bookmatching, vein cut, cross cut, the decision is yours!

System

Jura Limestone fixed via aluminium sub-frame to steelwork

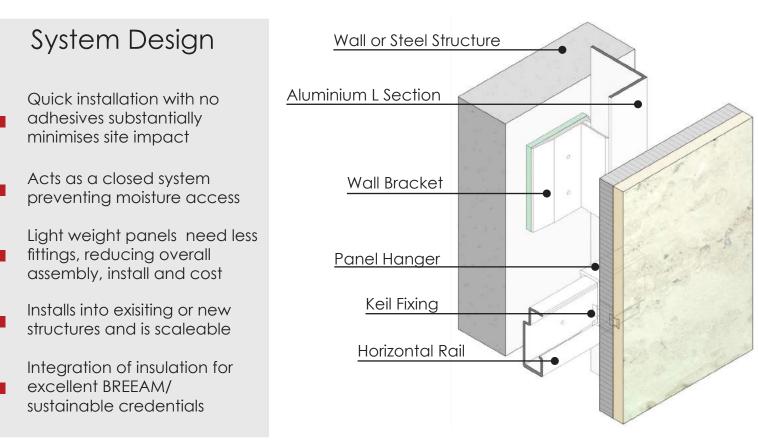

A bespoke design.

Each build comes with a bespoke aluminium sub frame system designed for you.

We'll take responsibility in ensuring safety and optimum design without you having to worry.

Our safe contractor approved fitters are well trained in installation, ensuring the job runs smoothly.

It's also exterior approved meaning we account thermal and wind loading into the design.

Service

A personalised touch.

Synonymous with all of Cristofoli International services, we provide a complete service:

Design- Supply- Manufacture-Install

Our service is unmatchable. We handle each aspect to allow you to focus on other matters.

We take your conceptual idea and turn it into reality. Advising you on suitable stone and providing you with a complete solution.

Install

Manufactured parts

delivered to site.

In tandem, aluminium

frame is installed to

exisiting wall or steel

structure.

All parts fitted using

our safe contrator

approved fitters.

Installed interior Jura Limestone wall featuring bespoke finish

Design

Take your design brief and estimate build time material finish.

In-house architects can prepare renders to assist in choosing an ideal colour and material finish.

Supply & Manufacture

Our international sourcing team locates the required stone blocks to be cut and bonded.

Stone slabs profiled, assembled and packaged to be sent to your site.

Custom Finishes

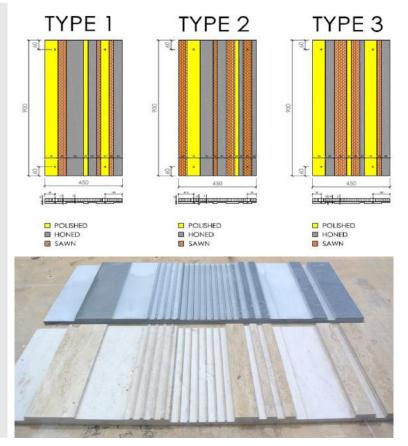

Next Retail - High Wycombe

Our in-house CNC and WaterJet technology allows us to create unique finishes at your request.

The client requested a three dimensional effect, requiring an extensive "trial and error" process of varying natural stones and surface finishes to achieve the desired finish.

As opposed to traditional honed or polished finish, we proposed an alternate solution.

Using CNC 5 Axis technology and various cutting heads we created a three tone finish. Combining the three surface finishes and fluctuating material depths helped enhance the desired three dimensional effect.

Finished Product at cash registers interior

Material Finishes

We at Cristofoli International have global connections to the stone market giving us access to an endless selection of materials. We colour match your requested material to find the best suitable option in terms of material properties and finish.

Whilst material choice is endless, so too is finish, below is a selection of available finishes to help achieve your unique artistic vision:

Brushed

Corretecia

Laser

Polished

Printed

Rigatto with 3D effect

Rockfinish

Satin

Scored

Textile

Water flaming

Wood

Cristofoli INTERNATIONAL

Natural Stone holds a beauty that lasts an eternity but is renowned for being heavy and awkward to work with.

By bonding a thin layer of stone to a lightweight carrier panel **CRISTOFOLI INTERNATIONAL** offers you the practical solution.

Thanks to KEIL attachment technology we can provide a secure fixing directly into the stone. Easy handling and installation without compromising strength or elegance.

Our Lightweight Stone Panels are suitable for numerous applications including building interiors, cladding and perfect for fast installations where weight has to be kept to a minimum.

> Dimension slab: cut to size to project requirement Thickness: subject to material, 12mm - 15mm stone
