

Metiez Nature Matters

Surrounding yourself with nature increases creativity, concentration and productivity. It makes for less absenteeism, you feel more at home and it creates more connection with each other and the space. Nature is there to help us, and the science shows us why. Do you want to improve acoustics? Creating more greenery, nature, atmosphere and privacy, we are happy to help you.

Moss

All the moss we use is 100% real and natural. Our moss grows and is harvested under state supervision. Everything with respect for nature.

All our moss has undergone a natural and environmentally friendly treatment making it beautiful, fresh and green for years to come. On average, a moss wall remains beautiful for 10 years.

Advantages off moss

Sustainable

Great for acoustics

Eye-catchingly beautiful

Fire retardant

Dust and dirt repellent

Insect-free

Hyperallergenic

No maintenance required

Economical because no water or light is needed and no monthly recurring maintenance costs.

Tip:

New Moss Technique Pure moss

Because we want to work as *sustainably as possible, It was with pain in our hearts that we always had to throw away a lot of moss in order to keep only the usable heads.

So we went to see how we could also use the moss in a sustainable way.

And we succeeded, we asked some cooperation from the hospitality industry and young entrepreneurs and they found it even more beautiful than the tradition away of reindeer moss processing.

With the new technique * we glue the moss instead of tacking it on the side.

This allows you to see the whole structure of the moss and not just the spheres.

This gives you a lot of life, structure and movement in the moss, this is what we received back from almost everyone during the research.

More exciting and it's never the same.

Even when different moss colors are mixed together, it is more spontaneous and unique.

So if you really want something completely new then the pure technique is really something for you.

We reuse as many materials as possible, such as boxes, filling materials, etc., in a sustainable manner

.For this we use glue made from potatoes, so completely natural

New Pure Moss

Social Distance

Considering the time in which we live now, social Distance is of great importance.

We can create safe workplaces by placing transparent screens, which can be done quickly and easily.

But is safety, sustainability and greenery of paramount importance to you?
MossDesk dividers give you and your employees a bit of privacy, safety and security.

They are also sound-absorbing.
They are available in various sizes, very quick and easy to install.

Available with various types and colors of moss.
If you have special wishes just discuss them with us.

Mossdividers, Roomdividers, Mobile mosswalls

I'm sure you recognize this. You just got off to a good start at work and a colleague gets a call, you work with headphones however you're still distracted.

Or you have a nice dinner at the end of your working day and want to enjoy your company and the food in peace and quiet. But that will be completely made impossible by all the chatter and sound. In such a way that you would prefer to leave again?

Does your workplace deserve more atmosphere? Do you want more privacy in your workplace? Are the ideas full of color but the walls white? Everywhere in the world workplaces are becoming greener and there is a greater need for flexible workspaces. To make this possible, we have developed the MossDivider. You want to redecorate your office, canteen, practice, restaurant or living room. How about an attractive, exclusive Eye Catcher by maintenance free moss?

Our mobile moss walls are real mood creators and can be produced in any size. The Moss Divider comes in different wood, colors and moss types even as Jungle Wall.

Whichever Moss Divider you choose, you will always get the best quality from us. We start from the golden ratio.

Ask about our competitive prices, we deliver the highest quality and everything is made with the same care and craftsmanship. A suitable Moss Divider for every budget.

New, everlasting plants.

We apply these plants in our Jungle moss walls.

These plant branches are natural branches of which the juices have been replaced by natural and environmentally friendly juices.

Because of this, these also *seasons to years beautiful.
They keep their color and they don't get ugly brown leaves.

For best results, ask our advice which plants can be used in your design and placement.

* However, they remain plants and one plant is always different from another, so each plant can differ a little and also in vase life.
That is why we ask you to let us advise you which plants are most suitable for your design and the space where the moss wall is applied.

Hint:

They are also cost effective just like the moss walls. They don't need any maintenance.

For interior advisors, concept design, interior designer the interior industry that wants to provide the customer with the most beautiful design, green and think along with you about cost savings.

But also for everyone who wants the most beautiful plants at home without having to look at them. From now on everyone has green fingers with real plants.

Attention: The plant branches cannot be exchanged or returned.
