

3 months Mental training Program Mental fitness

[Register here](#)

” *I think it's a fantastic program. I like the combination of the theoretic parts based on scientific results and the different mindworkout practices*

” *I am happier, more positive and enjoy life more, seeing the "small things" in life more easily and am more grateful for it. I felt good even before the Mindworkout training, but these feelings have somehow intensified. What I am most surprised by is ... find it much easier to listen actively for a longer period of time and maintain focus, like when we have longer meetings of three hours. Awesome 😊*

MINDWORKOUT

3 months Mental training program for Mental fitness

Are you ready to invest time in your own wellbeing?

Do you want to **learn and practise mental techniques** for increased well-being, self leadership and sustainable performance? Do you want an improved work life balance?

This program requires daily/weekly practice and a schedule for your own training in the calendar.

- 30 minutes live sessions, or recorded, via zoom weekly and 4 Educational workshops (scheduled)
- Practise effective 3-10 minutes recorded sessions when it suits you.
- An individual goal plan and follow up survey
- A buddy

This program includes a mix of theory and practical training in evidence-based techniques from compassion-focused therapy, CBT, coaching, mindfulness and sports psychology. [Link](#) to the specialists behind the content.

After the program: Continued training as member in the Mindworkout Gym.

Program objectives

- Create habits for mental recovery, positive energy and time for reflection in everyday life.
- Learn mental training tools and techniques.
- Increases conscious awareness, resilience, focus creativity and self-compassion.
- Mental fitness & Sustainable performance.

Effects

- In average 25% increased well-being* and sustainable productivity.

(* Source: Scientific studies and 1000s of participants' answers in Mindworkout's ongoing survey via Google survey.

Content

The four rooms of Mental training

Based on neuroscience, designed by licensed psychologists, mental trainers, coaches, mindfulness supervisors.
Selected techniques from cognitive behavioral therapy, CFT, coaching, sports psychology.
