

Dear Parents/Carers:

Welcome to the Summer Term.

We have started an exciting new topic called Groundbreaking Greeks. The children have been given knowledge organisers to read and a list of home learning projects to choose from. We are looking forward to exciting learning taking place this term.

Maths: This week, we have looked at drawing, reading and interpreting line graphs and tables. This is an important skill, which crosses over many subjects. The children have enjoyed this topic and we will continue it next week too.

Please ensure your children are continually practising basic maths skills on SUMDOG.

Please continue revising times tables with your children, along with practising the four operations (+, -, x, /).

English: We have continued our text, 'Beowulf' by Michael Morpurgo, and the children have written an obituary for our hero, Beowulf. They were focussing on using powerful noun phrases.

Science: We have started our new topic of Space. How many facts about space can the children find? Which is their most favourite fact?

Home-learning: Our children need to be reading at home at least 3 times weekly. The Reading Records should be **filled in regularly** and we expect them in on Wednesday after the break, along with the home learning journals. **Please remember**, we expect the homework to be of a high standard.

As usual, please complete a project based on the home learning task ideas that have been stuck into the home learning journals. We will expect them in on Wednesday.

Have a good weekend,

Miss Frois, Mrs Bhasin, Mrs Simpson-Wright and Mrs Kovacs-Pereira
