

# How will you innovate for a better future?

Strategic Sustainable Development

Product-Service Systems

Innovation

[bth.se/mspi](http://bth.se/mspi)

“BTH conducts worldleading research and education in strategic sustainable development and sustainable product innovation. This work is of great value to industry and society. The knowledge and methods being developed and taught provide good directions for investments and product development decisions.”

– Dr. Leif Johansson,  
President, Volvo Group

**The results of unsustainable product design** are evident worldwide. Products contribute to global sustainability problems such as climate change, landfill waste and inhumane work environments during manufacturing. There is a need for systems innovators who can create leap frog solutions, can manage a whole innovation process for sustainability and who have a strategic approach. These are some of the challenges that graduates of the master's programme in **Sustainable Product-Service Systems Innovation** will be prepared to meet.

#### As a participant, you will gain:

- Unique competence in developing products and services for a sustainable society
- Experiential learning from a university community at the leading edge of research and industry collaboration
- A concrete planning and decision-making framework for addressing the greatest challenge for human civilization
- Excellent job opportunities in organisations of all sizes, across all sectors
- Access to a diverse and supportive network of sustainability alumni from BTH

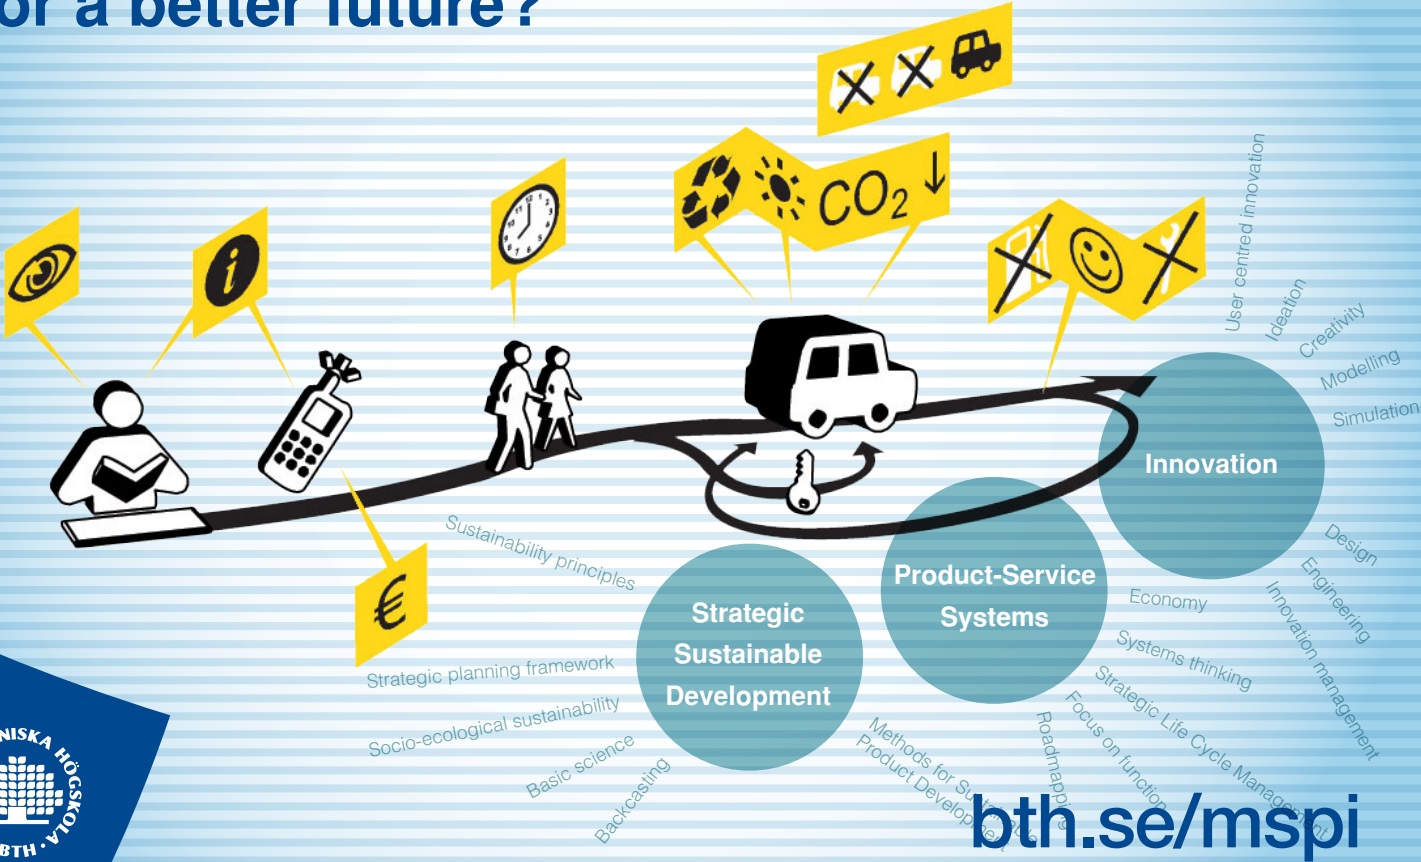

#### At a glance:

- **Degree:** Master of Science (2 year)
- **Credits:** 120 ECTS credits
- **Duration:** 2 years of full time study (Sept-June yearly)
- **Prerequisites:** Bachelor's degree in engineering, industrial economy, industrial design, or equivalent. Proficiency in English.
- **Language:** English
