

PRIVATE LIVE-IN CARE PROVIDER

Quality care and support services in the comfort of your own home.

ABOUT US

At Murray Healthcare, we are committed to promoting your self-sufficiency; hence, our services are person-centred and tailored to meet your specific needs. We make every effort to provide you with affordable and effective care services on a consistent basis.

Our employees are chosen through a rigorous recruitment and selection process to guarantee that we maintain high quality standards and continue to improve our service delivery. We have a devoted and supportive management team that is always working hard to ensure that we meet our aims of providing exceptional care services.

Our Private Live-in Care Services

We strongly believe that removing people from their homes, where they have lived for most of their lives and have fond memories, can have a negative impact on their overall well-being. We recognise that the prospect of leaving your home to live in a residential or nursing facility might be scary and very unwelcoming.

At Murray Healthcare, we offer you the option to have one of our highly experienced carers to move into your home with you to deliver quality, evidence-based care, allowing you to remain independent in the comfort and familiarity of your own home.

Our Private live-in care services are client centred and range from intensive nursing care needs to a modest degree of assistance with daily duties. You and your loved ones may rest easy knowing that you are in capable hands 24 hours a day, seven days a week.

All of our employees are educated to respect your autonomy, right to privacy, and to obtain your consent before engaging in any intervention while providing care to you.

Private Live-in care services include:

- **Assistance in daily tasks:**

It is crucial to maintain your self-image and hence, our carers are well equipped to assist with those seemingly little things that make you feel confident such as trimming your nails, helping you comb your hair and taking a bath.

- **Ensuring your safety in moving around the home:**

We seek to ensure that you move around the house with more ease and less risk of harming yourself.

- **Getting you community-connected:**

Maintenance of human relationships is crucial to any individual and hence, our live-in carers will be of assistance when you need to socialise with others and this includes visiting parks and your relatives.

Our other services

Providing you with person-centred care services that are tailored to your specific needs.

Domiciliary care

Domiciliary care is an effective option for you if you have health difficulties that require you to need care and extra support to manage your day-to-day tasks but still want to live in your own home.

We design a personalised care plan that suits your needs, interests, and living arrangements, making sure we encompass the way you do things in your home. You will always have complete control of the care and support you receive.

Palliative care

We understand that caring for a loved one at the end of life can be emotionally challenging and physically exhausting.

It is apparent that end of life affects not only the person who is fading away, but it affects all your loved ones. We will help to care for your loved one and manage your household affairs so that you will spend quality time as a family.

This includes helping around the house, as well as providing the family with emotional and moral support.

Companionship

Life begins to slow down as you grow older and your circle of influence gradually thins out too.

At Murray Healthcare, we realize how tough it may be to fit social activities into your hectic schedule, as you also try to find acquaintances. It can help to know that there is a kind, caring companion that visits on a regular basis, whether it is for you or for elderly family members nearby or across the nation.

Loneliness is a severe problem that needs to be treated because it has a number of negative consequences. In the last few decades, our culture has evolved tremendously, and families no longer spend as much time together as they once did.

Respite care

Respite care is the option you take when you need a trained, professional carer to step in for you as you take a step back, either short term or long term. Respite care allows you to take a holiday, attend to a family emergency and at the same time be assured that your loved ones continue to receive competent care and support

When you take a break from caring for your loved ones, you can re-energize your emotional, physical, and mental reserves, which may have been gradually exhausted as a result of not prioritising your own needs.

Complex care

Persons who need complex care are often associated with significant and on-going healthcare needs, as a result of chronic illness, impairments, or hospitalisation. Most people believe that the only place to get complex medical care is in a hospital or nursing home

We make it a priority to continuously assess our carers to ensure you receive the most relevant complex care possible. At Murray Healthcare we are dedicated to helping you to achieve your goals for improved health and well-being.

WHAT IS NEXT?

STEP 1

Kindly get in touch to book a free consultation with us.

info@murrayhealthcareservices.com
[01164030152](tel:01164030152)

STEP 2

Once the consultation date is confirmed, our Assessment team will visit you at your home to discuss your care needs and formulate a care plan.

STEP 3

You will be matched with a Carer with similar interests and preferences as you. Care will commence.

STEP 4

Monitoring and evaluation to see if you are being given the best care you deserve.
