SECTION 4: First aid measures

4.1 Descrition of first aid measures

General advice:	If medical advice is needed; have product container or label at hand.
After inhalation:	Remove person to fresh air and keep comfortable for breathing. Call a POISON
	CENTRE/ doctor (if you feel unwell).
After skin contact:	Take off immedicately all contaminated clothing. Rinse skin with water / shower. If
	there are signs of irritation or other symptoms; Seek medical attention.
After eye contact:	Rinse cautiously with water for several minutes. Remove contact lenses. Continue
	rinsing. If eye irritation persists; Get medical advice/attention.
After swallowing:	Wash mouth. Do NOT induce vomiting: Never give anything by mouth to an uncon-
	cious person. Get medical attention if you feel unwell.

4.2 Most important symptoms and effects, both acute and delayed: Cause skin irritation; May cause an allergic skin reaction; Causes serious eye irritation; May cause respiratory irritation. Physical Hazard 1

4.3 Indication of any immediate medical attention and special treatment needed: Treat for symptoms, no known specific medicine.

SECTION 5: Fire-fighting measures

5.1 Extinguishing media	Use CO2, powder, water spray or alcohol resistant foam to extinguish.	
Suitable extinguishing agents:	Do NOT use water with full jet.	
5.2 Special hazards arising from the substance or mixture: Carbon monoxide and oxynitride.		

5.3 Advice for firefighters	
Protective equipment:	Wear an approved positive pressure self-contained breathing apparatus
	(Comply with EN 133)

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures:

Cut off leakage source and collect spillage timely if safe to do so; Ensure adequate ventilation; Eliminate all ignition sources (no smoking, flares, sparks or flames in immedicate area); Wear personal protective equipment; avoid breathing vapors; Beware of accumulation of vapors in low areas or contained areas, where explosive concentrations may occur; Avoid contact eyes and skin.

NAILPERFECT

PROFESSIONAL SYSTEMS

6.2 Environmental precautions:

Prevent further leakage or spillage if safe to do so; Prevent spillage from entering drains, sewer or confined areas; If spillage contaminates rivers, lakes or drains: Inform respective authorities.

6.3 Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust); Ensure good ventilation; Dispose contaminated materials as waste according to section 13.

6.4 Reference to other sections:

See section 7 for information on safe handling: See section 8 for information on personal protection equipment; See section 13 for disposal information.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Ingredients with limit values that require monitoring at the workplace: No data available

Engineering Controls: Local exhaust ventilation is recommended when general ventilation is not sufficient to control airborne contamination below occupational exposure limits.

Respiratory Protection: Use COSHA approved respirator if there is potential to exceed exposure limit(s). If this material is handled at elevated temperatures or under mist forming conditions, without engineering controls, a COSHA approved respirator must be use

Skin Protection: Use impermeable gloves and protective clothing as necessary to prevent skin contact. Neoprene gloves

Eye/Face Protection: Safety goggles or safety glasses with side shields. In a splash hazard environment, chemical goggles should be used in combination with a full face shield.

8.2 Exposure controls

Appropriate engineering controls:

Handle in accordance with good industrial hygiene and safety practice; Wash ahdns and face before breaks and at the end of work; See section 7 for information about design of technical facilities.

Respiratory protection:

Use Dustmask/COSHA approved respirator

Facial protection

Faceshield is recogmended

Protection of hands

Use protective gloves.

Use gloves made of butyl rubber Neoprene rubber, nitrile rubber (thickness > 0.11mm; breakthrough times up to 480 minutes).

Eye Protection
