NexGen Wafer Systems is Driving Innovation in Semiconductor Manufacturing

Headquartered in Singapore, NexGen Wafer Systems is a global supplier of wet etch and clean equipment for the semiconductor industry. The fully automated processing systems play an essential role in numerous steps of microchip manufacturing and are used globally by leading semiconductor manufacturers.

International customers are supported worldwide from five locations. With engineering and manufacturing facilities in Austria and an international team of over 100 professionals, NexGen supports its customers worldwide in all major semiconductor manufacturing regions.

Microchips are fundamental components of modern technologies. They are used in a wide range of electronic devices, from smartphones and laptops to cars and industrial control systems. Microchips enable the processing of information, data storage, and application execution in all electronic products.

NexGen Wafer Systems' commitment to innovation and tailored solutions positions the company as a partner for addressing the current and future challenges of the semiconductor industry. By providing innovative technologies, NexGen Wafer Systems helps lay the foundation for the ongoing development of our digital world.

Facts

- Provides High-Tech Wet Chemical Process Equipment for Semiconductor Manufacturers
- Founded in 2011
- More than 100 employees worldwide (20 nationalities)
- More than 200 installed process chambers worldwide

Locations:

- Singapore: Headquarters, Application Research & Development, Sales & Customer Support
- Austria, Villach: Equipment Development & Engineering, Manufacturing, Sales & Customer Support
- USA, Arizona: Sales & Customer Support
- China, Shanghai: Sales & Customer Support
- Taiwan R.O.C., Hsinchu(Sales Representative): Sales & Customer Support
- South Korea, Hwaseong (Sales Representative): Sales & Customer Support

History:

- 2011: NexGen Wafer Systems Pte Ltd, Singapore.
- 2016: NexGen Wafer Systems GmbH, Austria.
- 2022: NexGen Wafer Systems America LLC, USA.
- 2023: Sales Representative, South Korea.
- 2023: NexGen Wafer Systems Shanghai, China.
- 2024: Sales Representative, Taiwan R.O.C.

Founded in Singapore in 2011, NexGen Wafer Systems has grown from a small start-up to a respected name in wet etching and cleaning systems in the semiconductor industry. With development and manufacturing based in Villach, Austria, NexGen Wafer Systems supports its global partners with a team of over 100 employees, including more than 70 experienced engineers. With over 200 installed process chambers worldwide, NexGen aims to become a leading provider of surface treatment applications. Its global support and sales offices ensure efficient support and quick spare part supply in all major semiconductor regions. NexGen's research and demonstration centre in Singapore also offers customers a platform for collaborative process development to respond quickly and effectively to their research and development needs.
