

Another cost and time saving accessory from **TECNA**

Half Connector

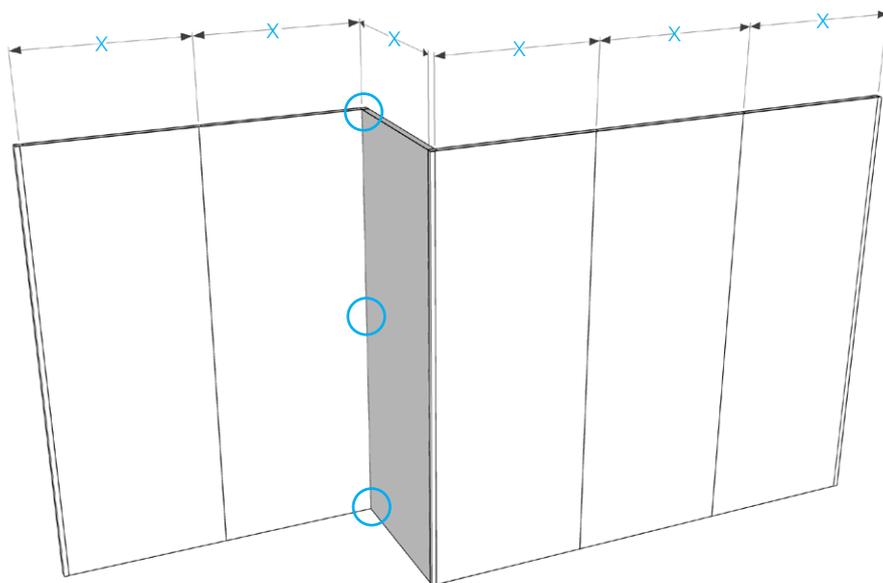

PRODUCT CODE: **CONTE**

We designed the half connector to create internal corners without having to adjust the width of your panels.

The half connector is sized so that the 2 graphics overlap in the corner.

Half Connector || PRODUCT CODE: **CONTE**

This means that ALL the panel sizes can be the same size even on internal corners; Use C or L profiles at the ends of the wall and external corners.

It can also be used wherever you need that extra length on the tube. *i.e. when you want to convert an edge to edge fabric panel to an edge to centre panel.*
