## RETRO FIT ACCESSORIES

### Broad range of display accessories

T3 Affinity is a modular framework designed for all manner of display requirements; created by T3 Systems as a cost effective solution with a focus on simple installation, efficient storage and transport.

The system is made of aluminium horizontal beams and vertical posts joined together using a no tools patented twist lock connection. The beams and post range from 200mm to 1500mm in length with custom lengths available for bespoke projects.

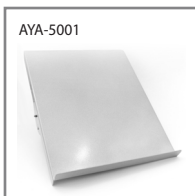

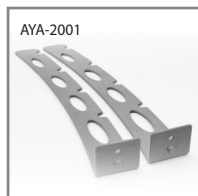

There is an extensive range of retro fit parts designed to support all graphic types, shelving solutions, lighting, monitor and tablet holders with the option to be combined with the famous T3 System.

T3 Affinity provides unlimited design potential yet remains simple to transport and install.

All the accessories can be attached using no tools, 'TLC' Twist Lock Connect.

Below are a few examples of the huge variety of accessories that are available to users of the T3 Affinity system.

Please use the reference number in conjunction with our catalogue, this will provide more options and information about our parts.
