

T3 AFFINITY

RETAIL SOLUTIONS

SPACE SAVING, EFFICIENT DISPLAYS

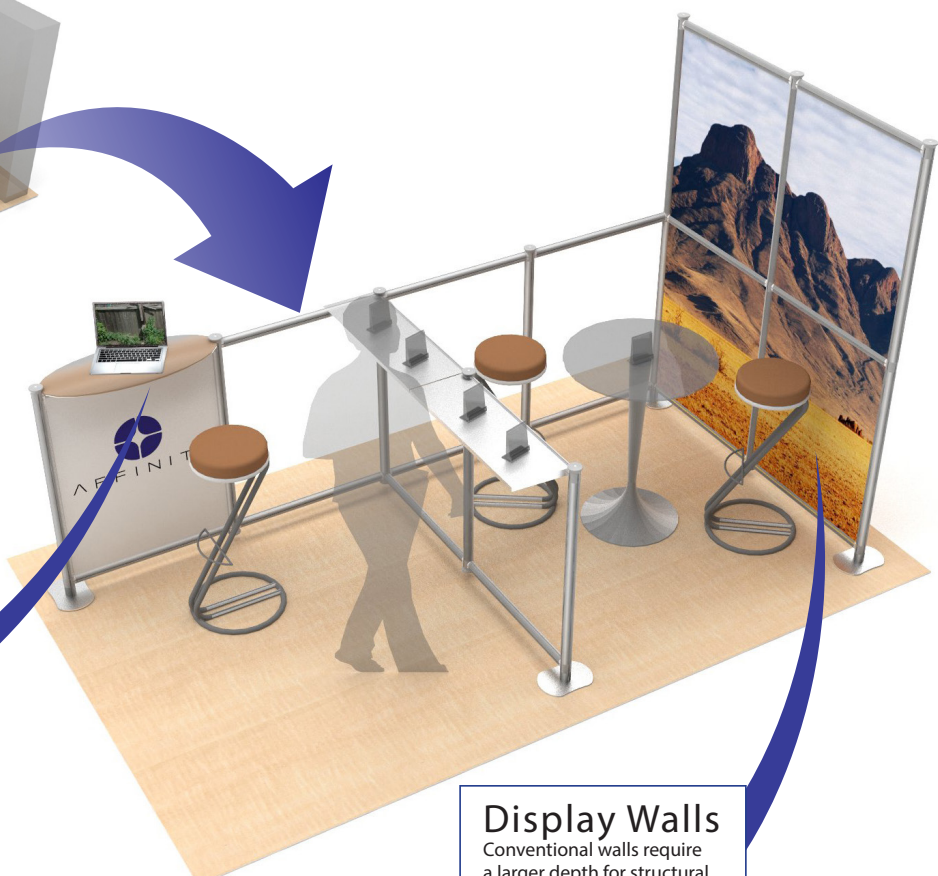

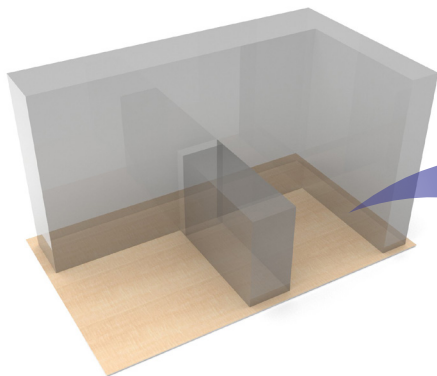

Save space with T3 Affinity

T3 Affinity is a modular framework designed for all manner of display requirements; created by T3 Systems as a cost effective solution with a focus on simple installation, efficient storage and transport. The system is made of aluminium horizontal beams and vertical posts joined together using a no tools patented twist lock connection.

There is an extensive range of retro fit parts designed to support all graphic types, shelving

solutions, lighting, monitor and tablet holders with the option to be combined with the famous T3 System.

Where conventional display systems require a large amount of space to build upon, due to the patented system one of its key benefits is that the framework takes up less space. Its retro fit accessories attach easily onto the framework means that structures need not get large to accommodate shelving

Conversion

Other systems require a larger depth in framework to include all the display features. This image showcases the conversion to a T3 Affinity display.

Shelves

Use our brackets to attach a variety of shelving units to your framework easily.

Low Walls

Create low divider walls with foamex rigid panels that can be easily changed for multiple events and uses

Display Walls

Conventional walls require a larger depth for structural purposes. But Affinity allows users to maximise of space to due to its foamex panels and retro fit feet.
